RESEARCH OBJECTIVES

This report studies the current scenario as well as the future potential of 4-tert-amylphenol market across the globe. The market for 4-tert-amylphenol has been segmented on the basis of application, end use, and region.

Key features of the study:

- This report provides in-depth analysis of the 4-tert-amylphenol market, and provides market size (US$ Mn & Tons) and compound annual growth rate (CAGR) (%) for the forecast period (2020–2027)
- It elucidates potential revenue opportunity across different segments and explains attractive investment proposition matrix for this market. It provides valuable insights about market drivers, restraints, opportunities, regional outlook, and competitive strategies adopted by the leading players.
- It profiles leading players in the global 4-tert-amylphenol market on the basis of the following parameters – company overview, financial performance, product portfolio, geographical presence, key developments, and future plans
- Insights from this report would allow marketers and management authorities of companies to make informed decisions with respect to future product launches, market expansion, and marketing tactics
- The global 4-tert-amylphenol market report caters to various stakeholders in this industry including investors, product developers and manufacturers, distributors, new entrants, and financial analysts
- Stakeholders would greatly benefit in decision-making through various strategy matrices used in analyzing the 4-tert-amylphenol market

ASSUMPTIONS

Assumptions

- **Market & Forecast :**
  - Changes in the inflation rate have not been considered while forecasting market numbers
  - Macroeconomic indicators such as GDP, end-use business scenario, regulatory decisions and prices have been considered to arrive at the market estimates
  - Bottom-up approach has been followed to assess market numbers for types of segments
  - Top-down approach has been used to counter-validate the estimated numbers for each type of the segment

- **Currency :**
  - All the values estimated are in US$ (U.S. Dollar) and Tons

- **Scope :**
  - Year of Estimation – 2020
  - Historic Year- 2017, 2018, and 2019
  - Forecast Period – 2020 to 2027

GLOBAL 4-TERT-AMYLPHENOL MARKET OVERVIEW

Summary

- The global 4-tert-amylphenol market was valued at US$ 22.7 Mn in 2019 and is expected to reach US$ 25.7 Mn by 2027, exhibiting a CAGR of 4.8% during the forecast period

- Among application, plastic additive segment held the largest revenue share of 62.3% in the global 4-tert-amylphenol market in 2019 and is expected to maintain its dominance in the near future. The segment was valued at US$ 14.2 Mn in 2019 and is expected to witness a CAGR of 4.8% during the forecast period.

- Among end use, plastics & polymers segment held the largest revenue share of 62.3% in the global 4-tert-amylphenol market in 2019 and is expected to maintain its dominance in the near future. The segment was valued at US$ 14.2 Mn in 2019 and is expected to witness a CAGR of 4.8% during the forecast period.

- Among region, North America segment held the largest revenue share of 34.1% in the global 4-tert-amylphenol market in 2019 and is expected to loose its share to Asia-pacific region in the future. The segment was valued at US$ 7.8 Mn in 2019 and is expected to witness a CAGR of 3.3% during the forecast period.

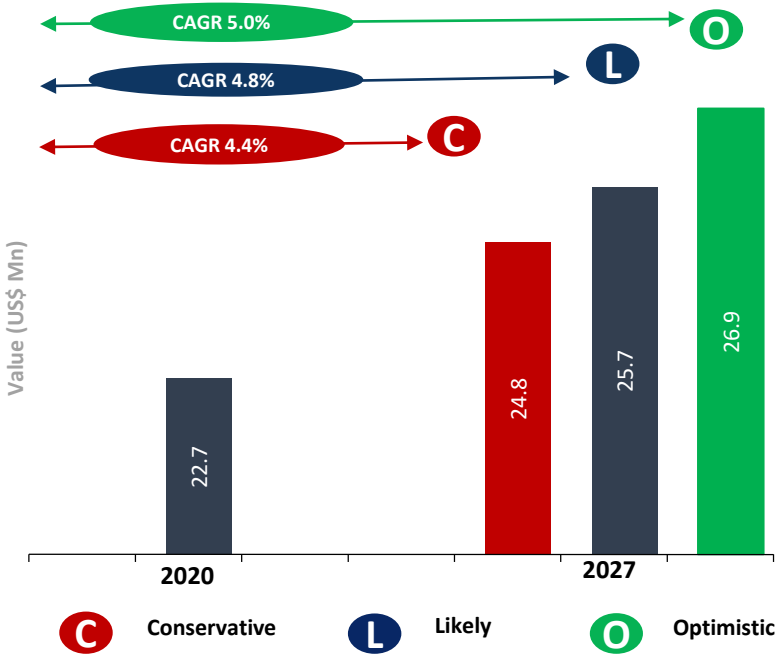
Global 4-tert-amylphenol market is projected to register a CAGR of 4.8% in terms of revenue during the forecast period

FIGURE 3 Global 4-tert-amylphenol Market Value (US$ Mn) – Scenario Forecast, 2020 & 2027



Optimistic Scenario: The market is expected to gain significant traction during the forecast period, owing to the increasing demand for 4-tert-amylphenol from various end-use industries. The market is projected to be valued at US$ 26.9 Mn by the end of 2027, at a CAGR of 5.0% during the forecast period.

Likely Scenario: Factors such as increasing oil drilling activities are expected to moderately impact growth of the 4-tert-amylphenol market and the market is expected to be valued at US$ 25.7 Mn by the end of 2027.

Conservative Scenario: Market indicators are expected to perform slightly below average due to stringent regulations on 4-tert-amylphenol on various regions. The CAGR is projected to decline to 4.4% and the market is expected to account for US$ 24.8 Mn by the end of the forecast period.

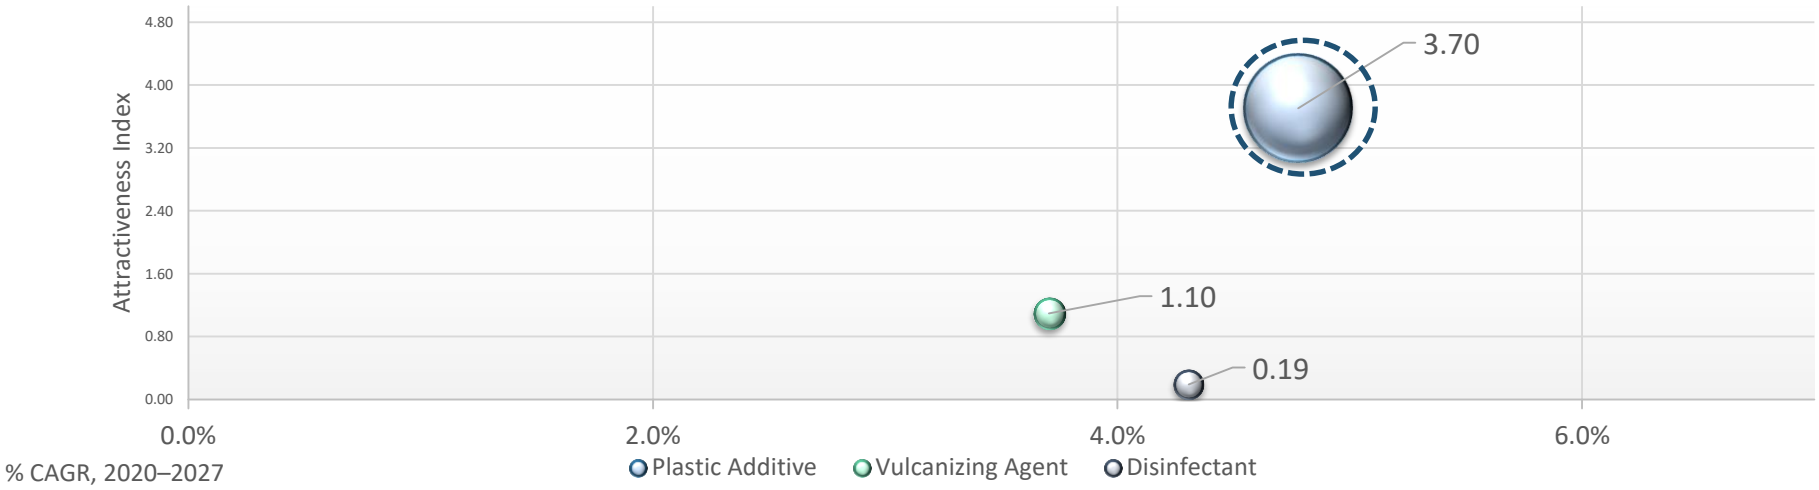
MARKET OPPORTUNITY MAP, BY APPLICATION

In terms of revenue share, Plastic additive segment is expected to hold dominant position in the market during the forecast period



- Plastic additive segment is expected to gain major traction during the forecast period, owing to its increasing use in biocide application. 4-tert-amylphenol is utilized as a biocide in agricultural activities as well. This is expected to drive growth of the 4-tert-amylphenol market in the near future.

Rapid growth of end-use industries utilizing 4-tert-amylphenol (1/2)

1

- 4-tert-amylphenol or para-tertiary amylphenol (PTAP) is used in the manufacturing of phenolic resins, which are then utilized in paints, coatings, varnishes, and printing ink resins. The growing demand for infrastructure in various regions of the world, owing to increasing population, growing urbanization, and growing retail and hospitality sectors is expected to drive growth of the global 4-tert-amylphenol market over the forecast period. For instance, in 2015, the global construction perspectives and oxford economics together stated that the global construction market is expected to grow by US$ 8 trillion by 2030, reaching a total size of US$ 17.5 trillion and growing by an average annual rate of 3.9% by 2030.
- Furthermore, 4-tert-amylphenols are extensively used in the manufacturing of ethoxylated novolaks, which are used as oil field demulsifiers in oil drilling applications. Rising crude oil and shale gas exploration activities have paved paths for oil & gas drilling operations, which in turn has boosted growth of the global 4-tert-amylphenols market. For instance, according to the U.S. Energy Information Administration (EIA), in the U.S., around 330 units of crude oil rotary rigs were in operation in June 2016, which increased to 861 units in July 2018. Moreover, in 2015, the U.S. EIA stated that the total shale production in the U.S. was 15.2 trillion cubic feet, up by 13.4% from 13.4 trillion cubic feet in 2014. Moreover, according to the U.S. Department of Labor, Bureau of Labor Statistics, production of shale gas in the U.S. increased from 1.3 trillion cubic feet to 15.8 trillion cubic feet during 2007 to 2016.

Rapid growth of end-use industries utilizing 4-tert-amylphenol (2/2)

1

- Furthermore, 4-tert-amylphenol is also utilized as an antimicrobial pesticide in agricultural applications. It is also used as a disinfectant in farm and agricultural equipment applications. Increasing population across the globe is propelling demand for food, which in turn is accelerating growth of the agriculture industry. For instance, according to Population Reference Bureau, the worldwide total population was 7,536 million in 2017 and is projected to reach 8,563 million by 2030. Moreover, constantly increasing population is also propelling demand for steady supply of food, which is a major challenge for governments of various economies. To overcome this challenge, government offers subsidiary schemes and easy availability of advanced agricultural equipment at low cost. For instance, in India, Department of Agriculture, Cooperation and Farmers Welfare started Sub-Mission on Agricultural Mechanization schemes in 2014 to provide subsidiary to farmers on machinery. These factors are expected to drive the agricultural market growth across the globe, which in turn is expected to propel growth of the global 4-tert-amylphenol market over the forecast period.

Stringent government regulations

1

- Stringent regulations imposed by various governing bodies is a major factor hampering growth of the 4-tert-amylphenol market
- 4-tert-amylphenol or para-tertiary amylphenol (PTAP) is a member of the phenolic class of antimicrobials and is an active ingredient in food contact sanitizers and disinfectants primarily used on hard, non-porous surfaces. These products are majorly utilized in food handling applications, agricultural applications, as a disinfectant in residential, commercial, industrial, institutional, and medical applications.
- However, in December 2018, the U.S. Environmental Protection Agency (EPA) issued a Data Call-In (DCI) for the active ingredient para-tertiary amylphenol (PTAP) manufacturers in order to support the continued use of 4-tert-amylphenol in disinfectants. The EPA regulated the use of PTAP or 4-tert-amylphenol in disinfectants and asked the U.S. manufacturers and suppliers to stop manufacturing & selling PTAP-based disinfectant products.
- Moreover, in the European Union, the Biocides Products Regulation 528/2012 (EU BPR) covers a very diverse group of products such as pest control products, disinfectants, and preservatives. The BPR has made it mandatory to authorize all types of biocidal products and their active ingredients by European Chemicals Agency (ECHA) before entering the EU market. The ECHA also classified 4-tert-amylphenol as hazardous to the aquatic environment and is also suspected to be skin irritant and toxic for reproduction. Hence, they regulated the use of 4-tert-amylphenol and stopped using PTAP in disinfectant products since 2006.

PEST ANALYSIS

POLITICAL FACTORS

- Regulations limiting the use of materials such as 4-tert-amylphenol or para-tertiary amylphenol (PTAP) by regulatory bodies such as the U.S. Environmental Protection Agency and European Chemicals Agency is expected to negatively hamper growth of the 4-tert-amylphenol market
- Moreover, phenolic active ingredients are not approved in various countries such as China, Australia, and South Korea in the Asia Pacific region. With more restrictive regulations, the use of these active ingredients in disinfectants is expected to become a major challenge for disinfectant manufacturers.

ECONOMIC FACTORS

- Price of 4-tert-amylphenol is comparatively higher than nonylphenol, owing to high cost of its raw materials such as tert-pentanol, isoamylene, 2-methyl-3-butanol, aluminum chloride, etc.
- This factor is expected to hamper growth of the global 4-tert-amylphenol market

SOCIAL FACTORS

- 4-tert-amylphenol production and its use in germicides, pesticides, and rubber and petroleum industries among others is expected to result in its release into the environment through various waste streams
- 4-tert-amylphenol is classified as toxic and hazardous to the aquatic environment by the European Chemicals Agency (ECHA) and therefore, use of products containing 4-tert-amylphenol is regulated in the European Union (EU)

TECHNOLOGICAL FACTORS

- P-tert-amylphenol (PTAP) or 4-tert-amylphenol is commercially produced by the alkylation of phenol with isoamylene in the presence of aluminum chloride as an acidic catalyst
- Isoamylene is a mixture of 2-methyl-1-butene and 2-methyl-2-butene, which is produced by dehydration of the corresponding alcohol or back-cracking of the corresponding methyl ether
- 4-tert-amylphenol is then purified to required purity by fractional distillation

PORTER'S FIVE FORCES ANALYSIS

COHERENT MARKET INSIGHTS

Bargaining Power of Suppliers – High

- Raw materials required in the manufacture of 4-t-amylphenol such as tert-pentanol, 2-methyl-3-butanol, and aluminum chloride, among others are expensive and affect the quality of 4-t-amylphenol produced
- Owing to its use in disinfectants, 4-tert-amylphenol manufacturers need to procure high quality raw materials. Hence, bargaining power of raw material suppliers is high.

Bargaining Power of Buyers – Low

- The market is categorized by few public & private manufacturers. Bargaining power of buyers is low, owing to the lesser availability of 4-tert-amylphenol through other market players.
- High switching cost for buyers.

Competitive Rivalry – Moderate

- Strong presence of market players such as SI Group, SASOL Limited, Penta Manufacturing Company, and DeLong Chemicals America among others creates a competitive environment in the 4-t-amylphenol market
- However, the consumer demand is fulfilled by existing players, therefore there is no supply/demand gap. This creates lesser competitive environment.

Threat of Substitutes – High

- Quaternary ammonium compounds are excellent alternatives to 4-tert-amylphenol to be utilized as germicides in cleaning solutions.
- Moreover, due to high cost of 4-tert-amylphenol, many of the resin formulations are utilizing 4-tert-butylphenol in place of 4-tert-amylphenol.

Threat of New Entrants – Low

- Stringent regulations imposed on manufacturing & selling of 4-tert-amylphenol by the U.S. Environmental Protection Agency (U.S. EPA) and European Chemicals Agency (ECHA) have led to a lower threat of new market entrants.

Source: Coherent Market Insights, 2019-20

© Coherent Market Insights. All Rights Reserved

KEY DEVELOPMENTS

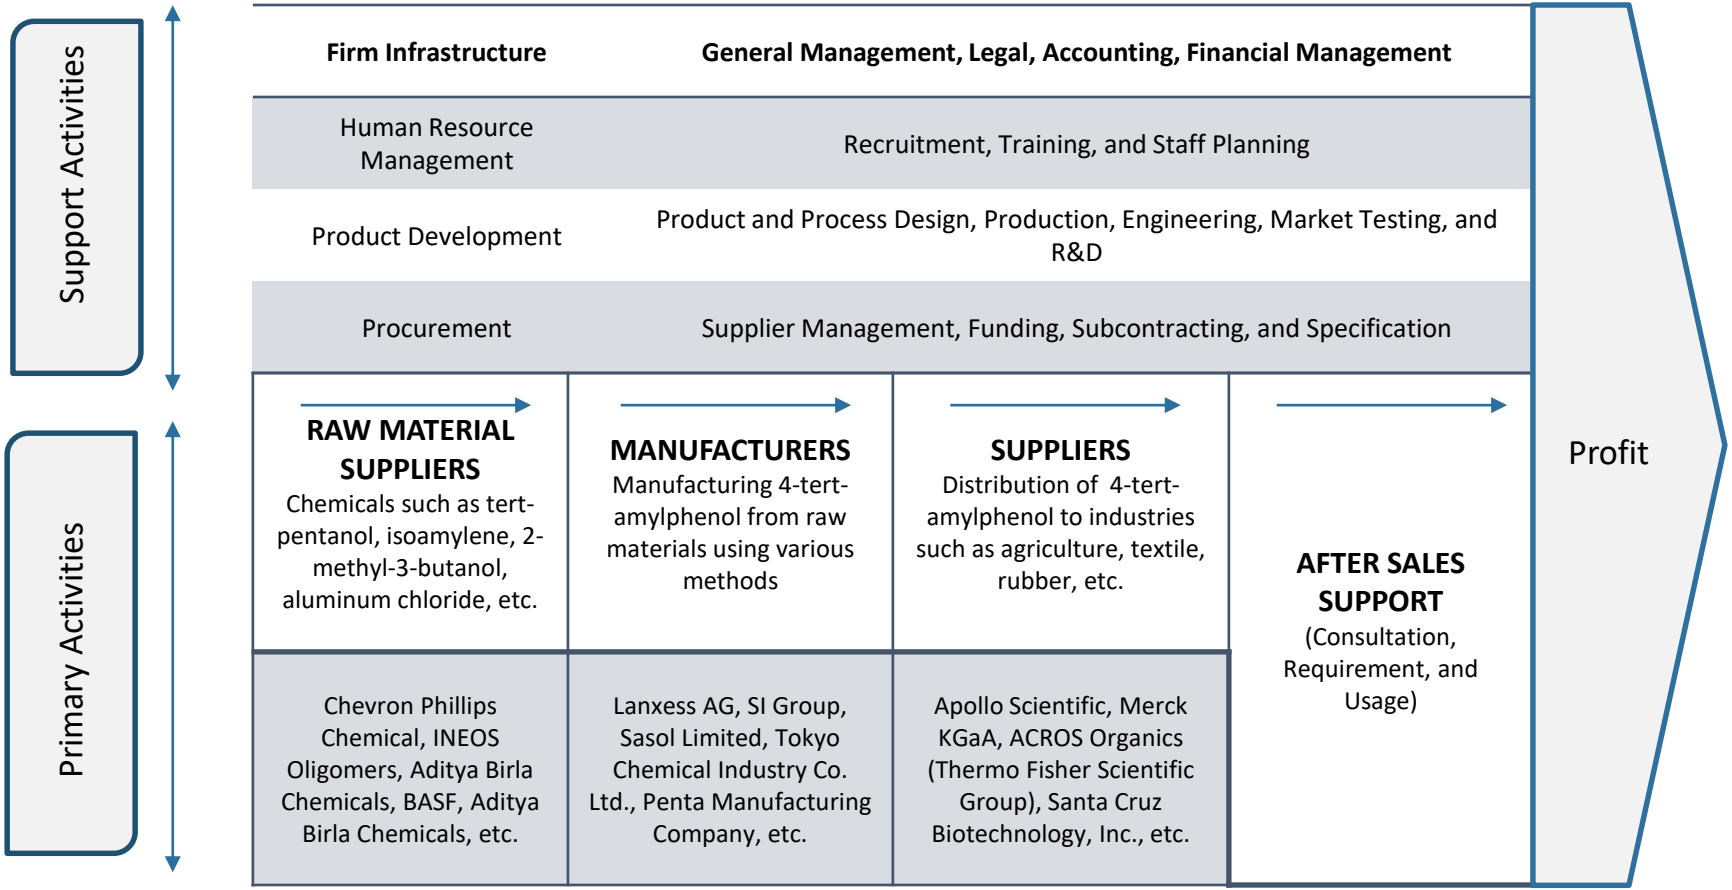
- In April, Schenectady South Africa (Pty) Ltd., the South African affiliate of SI Group, announced the continuation of its partnership with Hüttenes Albertus, a manufacturer of chemical products, to strengthen the company's market presence in Brazil and South Africa

2020

Source: Coherent Market Insights, 2019-20

© Coherent Market Insights. All Rights Reserved

VALUE CHAIN ANALYSIS



Source: Coherent Market Insights, 2019-20

© Coherent Market Insights. All Rights Reserved

REGULATORY SCENARIO

- In December 2018, the U.S. Environmental Protection Agency (EPA) issued a Data Call-In (DCI) for the active ingredient para-tertiary amylphenol (PTAP). Through the DCI, EPA stated that they will require additional data from the para-tertiary amylphenol manufacturers in order to support the continued use in disinfectants. However, due to the significant amount of data requested by the EPA, para-tertiary amylphenol manufacturers decided not to support the generation of additional studies.

- The EPA's December 2018 Data Call-In (DCI) of para-tertiary amylphenol (PTAP) regulated the use of PTAP and asked the U.S. suppliers to stop selling PTAP-based products. This regulation severely affected the U.S. 4-tert-amylphenol market, as pharmaceutical disinfectant manufacturers using PTAP-based disinfectant products were forced to find alternative solutions.

- Moreover, various regulatory associations across the globe are focusing on regulating the use of phenolic active ingredients. For instance, in the European Union (EU), the Biocidal Products Regulation (BPR) (EU 528/2012) states that all the biocidal products should be authorized by European Chemicals Agency (ECHA) before entering the EU market. The regulation also states that the active substances used in biocidal products must be previously approved by ECHA. Furthermore, ECHA in Annex III also identified 4-tert-amylphenol as hazardous to the aquatic environment, and is also suspected to be persistent in the environment, it is a skin irritant, and is toxic for reproduction.

- Hence, increasing restrictions by regulatory bodies across the globe on products containing phenolic actives such as PTAP is expected to restrain growth of the global 4-tert-amylphenol market over the forecast period

REGULATORY SCENARIO

Region	Regulatory Scenario
North America	• In December 2018, the U.S. Environmental Protection Agency (EPA) issued a Data Call-In (DCI) for the active ingredient para-tertiary amylphenol (PTAP). Through the DCI, EPA stated that they will require additional data from the para-tertiary amylphenol manufacturers in order to support the continued use in disinfectants. • However, due to the significant amount of data requested by the EPA, para-tertiary amylphenol manufacturers decided not to support the generation of additional studies. • The U.S. EPA asked the U.S. suppliers to stop selling PTAP-based products. This regulation severely affected the U.S. 4-tert-amylphenol market.
Europe	• The Biocidal Products Regulation (BPR) (EU 528/2012) states that all the biocidal products should be authorized by European Chemicals Agency (ECHA) before entering the EU market. • The use of 4-tert-amylphenol in disinfectant is subjected to the Biocidal Products Regulations 2001 (Statutory Instrument 2001/880), which implement the EU Biocidal Products Directive (98/8/EC).

Source: Coherent Market Insights, 2019-20

© Coherent Market Insights. All Rights Reserved

REGULATORY SCENARIO

Region	Regulatory Scenario
Europe	• The industry has not supported the continue use of 4-tert-amylphenol as an active substance in disinfectant application, and by September 2006, the disinfectant products containing PTAP had to be removed from the European market. The PTAP product has not been re-registered in the European region for disinfectant formulations since 2006.

IMPACT OF COVID-19 ON GLOBAL MARKET - OVERVIEW

Impact Analysis of Covid-19 on Global 4-tert-amylphenol Market

- 4-tert-amylphenol is used in various applications such as disinfectants, oil drilling, as a vulcanizing agent in the rubber industry, etc. The spread of COVID-19 globally resulted in measures such as lockdown and cease in economic activities, which has severely impacted the industrial sector in every region. Demand for 4-tert-amylphenol has virtually collapsed in oil & gas, rubber, and plastics and polymers industry for a period until governments lift their restrictive policies.
- The coronavirus pandemic has boosted the disinfectant market growth across the globe. For instance, Reckitt Benckiser Group Plc, a British manufacturer of health, hygiene, and home products, recorded 12.8% rise in sales of their disinfectants and dishwashing pods products in the first quarter of 2020. 4-tert-amylphenol is an active ingredient in disinfectants primarily used in disinfecting hard, non-porous surfaces. This growth of disinfectants market has boosted demand for 4-tert-amylphenol across various regions. However, stringent regulations imposed by the U.S. Environmental Protection Agency and European Chemicals Agency on use of 4-tert-amylphenol in disinfectants has forced disinfectant manufacturers to switch to quaternary ammonium compounds.
- Moreover, curtailment of global economic activity has put a break on fuel oil use for transportation and other activities. As a result of Covid-19, container trade volumes and container port volumes declined in the first few months of 2020. According to International Transport Forum, global container trade volumes declined by 8.6% in February 2020 compared to same month in 2019. Furthermore, owing to low demand, the global crude oil prices hit 18-year low mark on March 30, 2020, as the price of Brent Crude oil fell to US$ 22.58 per barrel. Thus, owing to low demand, there has been a sharp decline in oil drilling activities across the globe, which has negatively affected the 4-tert-amylphenol market growth.

GLOBAL 4-TERT-AMYLPHENOL MARKET OUTLOOK, BY APPLICATION (1/3)

Key Takeaways

- Plastic additive segment accounted for a market share of 62.3% in 2019 and is expected to account for 70.4% in 2027 in terms of value. The segment is expected to exhibit significant growth, owing to the rising use of 4-tert-amylphenol in the automobile and construction industries, for improving strength, increasing elongation, reducing brittleness, and increasing plasticity. These factors are expected to fuel demand for 4-tert-amylphenol as plastic additive during the forecast period.

- In 2027, the disinfectant segment is expected to account for a market share of 5.2% in terms of value and 5.4% in terms of volume. The segment witnessed rapid growth in terms of revenue in the past few years, owing to rising consumer awareness regarding infectious diseases and outbreak of various contagious diseases in the recent past. Moreover, implementation of stringent regulations by governments in order to provide safe drinking water and reduce the spread of water-borne diseases is expected to drive demand for 4-tert-amylphenol during the forecast period.

- The vulcanizing agent segment accounted for a total revenue of US$ 1.3 Mn in 2019 and is expected to reach US$ 1.5 Mn by 2027. The growth of the segment is primarily driven by the surge in demand for rubber in tire production for the automotive & transportation industries. Moreover, increasing manufacturing and sales of automobiles across the globe due to rise in disposable income has fueled demand for vulcanizing agents, which in turn will boost growth of the 4-tert-amylphenol market over the forecast period.

GLOBAL 4-TERT-AMYLPHENOL MARKET OUTLOOK, BY APPLICATION (2/3)

Key Takeaways

- The pesticide segment accounted for a revenue share of US$ 1.2 Mn in 2019 and is expected to reach US$ 0.8 Mn by 2027. The segment is expected to exhibit high growth, owing to growth of the agricultural industry across the globe. Key players are adopting growth strategies such as mergers and acquisitions, in order to enhance their market presence. For instance, in November 2018, Crystal Crop Protection, a manufacturer and supplier of agrochemical products, acquired pesticide brands from Syngenta AG, a Switzerland-based agrochemicals and seeds company. This scenario is expected to boost demand for 4-tert-amylphenol from agriculture industry and aid in growth of the segment during the forecast period.

- The emulsifier segment accounted for a market share of 5.1% in 2019 and is expected to account for 5.5% in 2027 in terms of value. The segment is expected to exhibit high growth, owing to rising demand for emulsifiers from the pharmaceutical industry where it is used in drug formulations such as tablets and syrups. The growth of emulsifiers segment is also attributed to growth of the pharmaceutical industry due to the rising production of drugs. These factors are expected to fuel demand for 4-tert-amylphenol during the forecast period.

GLOBAL 4-TERT-AMYLPHENOL MARKET OUTLOOK, BY APPLICATION (3/3)

Key Takeaways

- Other applications of 4-tert-amylphenol include biocide and chemical intermediates used in various end-use industries such as mining, pharmaceutical, manufacturing, and others. According to Coherent Market Insights' analysis, the global demand for specialty chemicals declined by over 5% in the month of May 2020 amid COVID-19 crisis. The demand for chemical intermediates used in mining, foundry, and paints industry has shown a major decline in the past few months, however, specialty chemicals utilized in pharmaceutical industry are expected to witness a significant growth in Asia Pacific in the near future, as the world looks out for an alternative API supplier other than China.

SECTION 6

GLOBAL 4-TERT-AMYLPHENOL MARKET ANALYSIS, BY END USE, 2017-2027 (US$ MN & Tons)

- Plastics & Polymers Industry
- Rubber Industry
- Surface Cleaners
- Textile
- Agriculture
- Oil Drilling
- Others

© Coherent Market Insights. All Rights Reserved

GLOBAL 4-TERT-AMYLPHENOL MARKET OUTLOOK, BY END USE (1/3)

COHERENT MARKET INSIGHTS

Key Takeaways

- Plastics & polymers industry segment accounted for a market share of 62.3% in 2019 and is expected to account for 70.4% in 2027 in terms of value. The segment is expected to exhibit significant growth, owing to the rising demand for plastics & polymers industry chemicals from emerging economies. However, the prices of plastics have been showing a declining trend in the recent past, owing to unprecedented reduce in the sales of automotive and electronic products during the coronavirus (Covid-19) pandemic. However, the demand for engineering plastics is expected to rise in the short term, as these materials are extensively used in medical applications, which in turn will fuel demand for 4-tert-amylphenol in plastics & polymers industry during the forecast period.

- In 2027, the surface cleaners segment is expected to account for a market share of 4.4% in terms of value and 4.6% in terms of volume. The rising demand for surface sanitization and disinfection, as a preventive measure for reducing the spread of Covid-19, has boosted the production rate of surface cleaners and disinfectants in Asia Pacific. Leading companies engaged in manufacturing of disinfectants are adopting different strategies such as product innovations, in order to expand their product portfolio and their market presence. For instance, on June 9, 2020, the Defence Institute of Advanced Technology (DIAT) of India, developed a nano-technology based disinfectant spray named Ananya, to stop the spread of Covid-19. The formulation can be used for disinfecting various types of surfaces and products such as masks, PPEs, hospital linens, and other likely contaminated surfaces such as medical instruments, elevator buttons, door knobs, corridors, and rooms. Such product innovations are expected to augment demand for 4-tert-amylphenol during the forecast period.

GLOBAL 4-TERT-AMYLPHENOL MARKET OUTLOOK, BY END USE (2/3)

COHERENT MARKET INSIGHTS

Key Takeaways

- The oil drilling segment accounted for a market share of 4.6% in 2019 and is expected to account for 5.2% in 2027 in terms of value, witnessing a CAGR of 4.8%. The segment has grown substantially in the recent past, owing to the rise in number of new oilfields and reserves, which have been discovered across the globe. Major players involved in petrochemical business are involved in various growth strategies such as collaboration and partnership, in order to gain competitive edge in the global market. For instance, in January 2019, BASF SE, a German-based producer of chemicals, and Adani Group, an Indian conglomerate, collaborated to form a joint venture of petrochemical production hub in Gujarat, India. Such collaborations are expected to fuel demand for 4-tert-amylphenol and drive growth of the segment during the forecast period.

- The textile segment accounted for a revenue share of US$ 0.2 Mn in 2019 and is expected to decline to US$ 0.1 Mn by 2027. The segment is expected to exhibit high growth, owing to increasing consumerism and rising disposable income of population, which in turn has led to rapid growth of the retail sector across the globe in the past decade. According to India Brand Equity Foundation (IBEF), the Indian textiles industry was estimated at around US$ 150 billion in 2019 and contributed around 7% of the industry output of India, in terms of revenue, in 2018-19. Such scenarios are expected to boost demand for 4-tert-amylphenol from the textile sector in the near future and drive growth of the segment during the forecast period.

GLOBAL 4-TERT-AMYLPHENOL MARKET OUTLOOK, BY END USE (3/3)

COHERENT MARKET INSIGHTS

Key Takeaways

- The rubber industry segment accounted for a total revenue of US$ 1.3 Mn in 2019 and is expected to reach US$ 1.5 Mn by 2027. The segment is expected to exhibit significant growth, owing to the rising applications of natural rubbers in injection parts, gloves, rollers, tubes as well as mammary prostheses and pacemaker leads in the healthcare industry. Furthermore, increasing demand for footwear is attributed to fuel demand for 4-tert-amylphenol from rubber industry during the forecast period. According to United States International Trade Commission, in 2018, the U.S. total exports of footwear increased by US$ 127 million, to that in 2017, to US$ 1.6 billion.

- The agriculture segment accounted for a market share of 5.8% in 2019 and is expected to account for 3.6% in 2027 in terms of value. The segment is expected to be fueled by increasing global population and subsequent increasing demand for food grains. For instance, according to the Food and Agriculture Organization of the United Nations, global cereal production in 2019 increased by 62 million tons from 2018 and was pegged at 2,719 million tons. These factors are expected to fuel demand for 4-tert-amylphenol in agriculture during the forecast period.

- Other end uses of 4-tert-amylphenol include use in pharmaceutical and specialty chemicals industry where it is used for formulation of various products and drugs. The demand for chemical intermediates used in mining, foundry, and paints industry has shown a major decline in the recent past, however, specialty chemicals utilized in pharmaceutical industry are expected to witness a significant growth in Asia Pacific in the near future, as the world looks out for an alternative API supplier other than China.

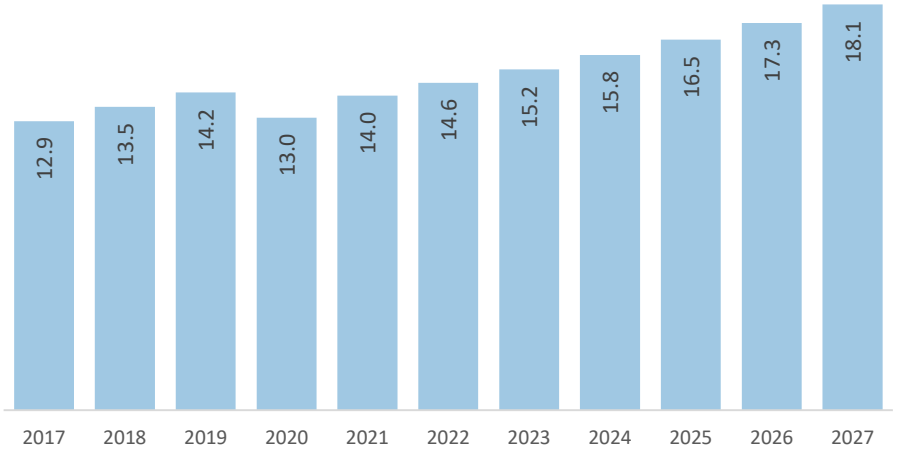
GLOBAL 4-TERT-AMYLPHENOL MARKET ANALYSIS AND FORECAST, BY PLASTICS & POLYMERS INDUSTRY

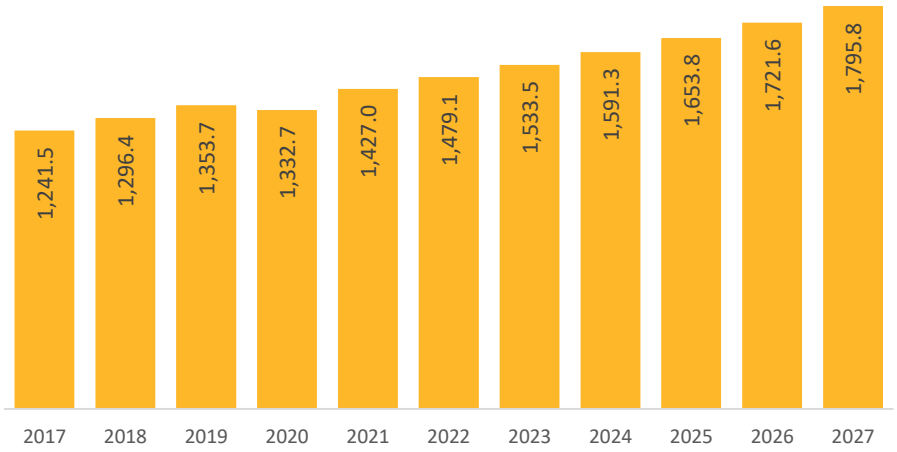
Plastics & polymers industry segment is expected to generate US$ 18.1 Mn in the global 4-tert-amylphenol market in 2027

FIGURE 3 Global 4-Tert-Amylphenol Market Value (US$ Mn) Analysis and Forecast, By Plastics & Polymers Industry



- Plastics & polymers industry segment in the global 4-tert-amylphenol market was valued at US$ 14.2 Mn in 2019 and is projected to increase to US$ 18.1 Mn by 2027, witnessing a CAGR of 4.8% during the forecast period

FIGURE 4 Global 4-Tert-Amylphenol Market Volume (Tons) Analysis and Forecast, By Plastics & Polymers Industry



- Plastics & polymers industry segment in the global 4-tert-amylphenol market was pegged at 1,353.7 Tons in 2019 and is projected to increase to 1,795.8 Tons by 2027, witnessing a CAGR 4.4% during the forecast period

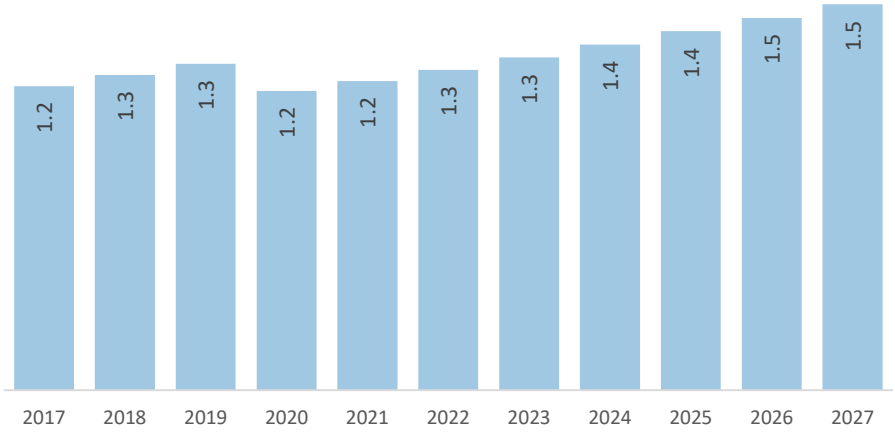
GLOBAL 4-TERT-AMYLPHENOL MARKET ANALYSIS AND FORECAST, BY RUBBER INDUSTRY

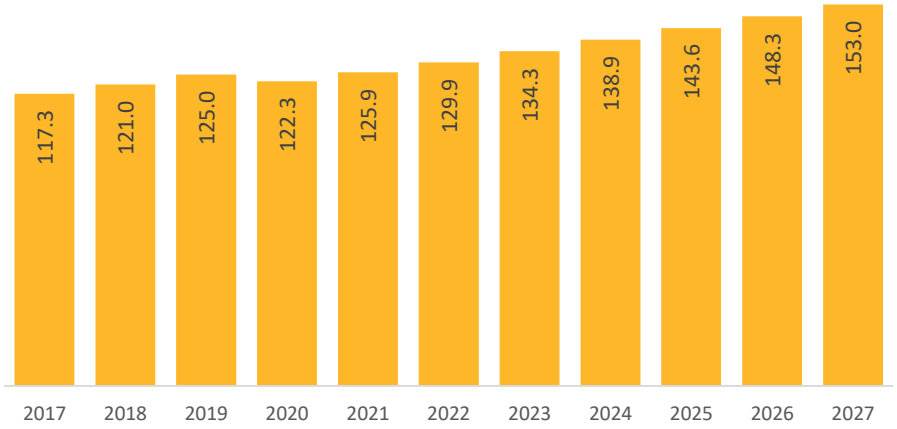
Rubber industry segment is expected to generate US$ 1.5 Mn in the global 4-tert-amylphenol market in 2027

FIGURE 5 Global 4-Tert-Amylphenol Market Value (US$ Mn) Analysis and Forecast, By Rubber Industry



- Rubber industry segment in the global 4-tert-amylphenol market was valued at US$ 1.3 Mn in 2019 and is projected to increase to US$ 1.5 Mn by 2027, witnessing a CAGR of 3.7% during the forecast period

FIGURE 6 Global 4-Tert-Amylphenol Market Volume (Tons) Analysis and Forecast, By Rubber Industry



- Rubber industry segment in the global 4-tert-amylphenol market was pegged at 125.0 Tons in 2019 and is projected to increase to 153.0 Tons by 2027, witnessing a CAGR of 3.2% during the forecast period

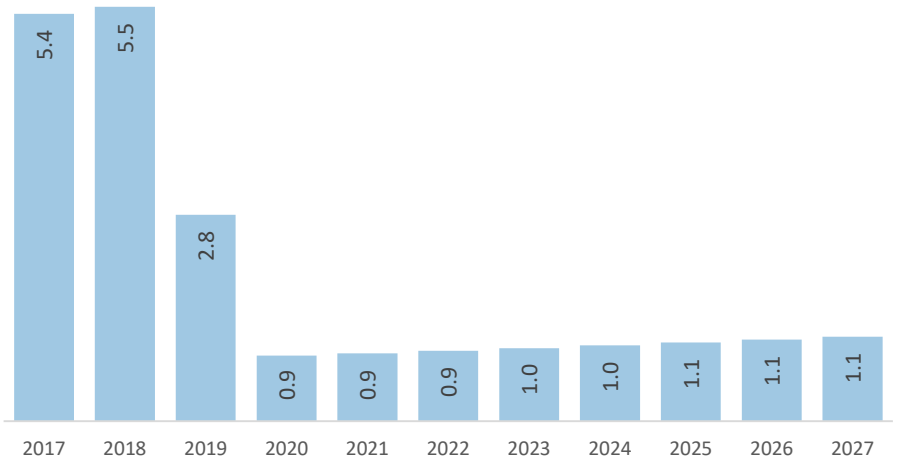
GLOBAL 4-TERT-AMYLPHENOL MARKET ANALYSIS AND FORECAST, BY SURFACE CLEANERS

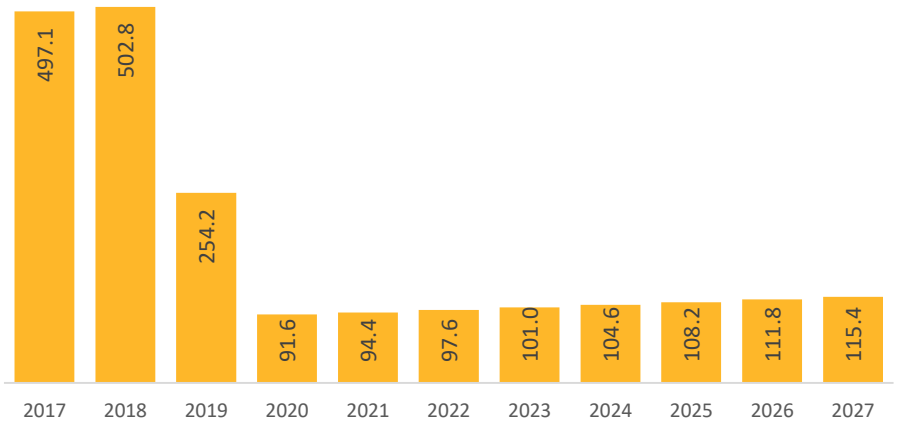
Surface cleaners segment is expected to generate US$ 1.1 Mn in the global 4-tert-amylphenol market in 2027

FIGURE 7 Global 4-Tert-Amylphenol Market Value (US$ Mn) Analysis and Forecast, By Surface Cleaners



- Surface cleaners segment in the global 4-tert-amylphenol market was valued at US$ 2.8 Mn in 2019 and is projected to decrease to US$ 0.9 Mn in 2020 due to the ban on PTAP in the U.S. cleanroom disinfectant products.

FIGURE 8 Global 4-Tert-Amylphenol Market Volume (Tons) Analysis and Forecast, By Surface Cleaners



- Surface cleaners segment in the global 4-tert-amylphenol market was pegged at 254.2 Tons in 2019 and is projected to decline to 91.6 Tons in 2020 mainly due to U.S. regulation on the PTAP for disinfection application

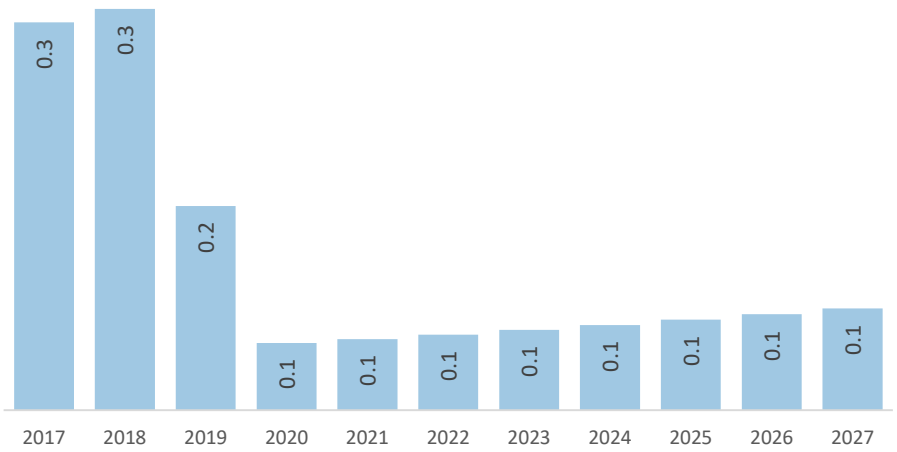
GLOBAL 4-TERT-AMYLPHENOL MARKET ANALYSIS AND FORECAST, BY TEXTILE

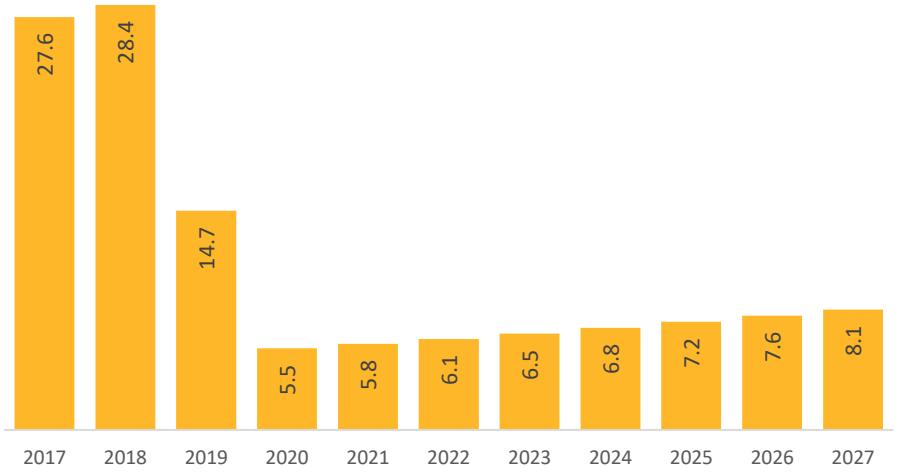
Textile segment is expected to generate US$ 0.1 Mn in the global 4-tert-amylphenol market in 2027

FIGURE 9 Global 4-Tert-Amylphenol Market Value (US$ Mn) Analysis and Forecast, By Textile



- Textile segment in the global 4-tert-amylphenol market was valued at US$ 0.2 Mn in 2019. However, due to ban in the disinfectant formulation in the U.S., the market has shown a sharp decline in the textile end-use as well

FIGURE 10 Global 4-Tert-Amylphenol Market Volume (Tons) Analysis and Forecast, By Textile



- Textile segment in the global 4-tert-amylphenol market was pegged at 14.7 Tons in 2019 and is projected to decline to 5.5 Tons by the end of 2020 due to stringent regulations in the North America.

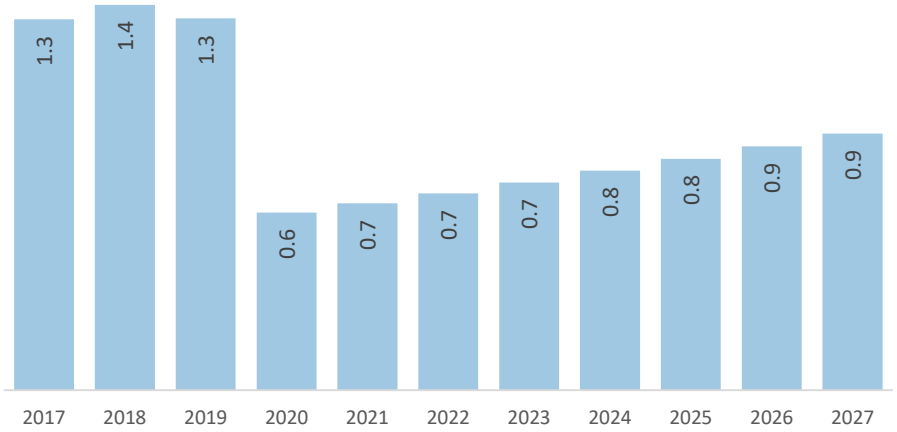
GLOBAL 4-TERT-AMYLPHENOL MARKET ANALYSIS AND FORECAST, BY AGRICULTURE

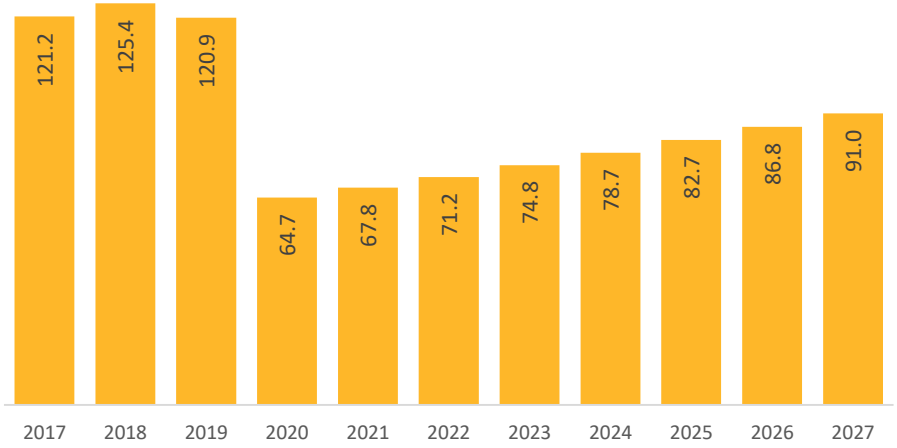
Agriculture segment is expected to generate US$ 0.9 Mn in the global 4-tert-amylphenol market in 2027

FIGURE 11 Global 4-Tert-Amylphenol Market Value (US$ Mn) Analysis and Forecast, By Agriculture



- Agriculture segment in the global 4-tert-amylphenol market was valued at US$ 1.3 Mn in 2019 and the ban on the PTAP formulation in Pesticide has also affected the market of PTAP in the agriculture end-use.

FIGURE 12 Global 4-Tert-Amylphenol Market Volume (Tons) Analysis and Forecast, By Agriculture



- Agriculture segment in the global 4-tert-amylphenol market was pegged at 120.9 Tons in 2019 and is projected to decline to 64.7 Tons by 2020.

SECTION 7

GLOBAL 4-TERT-AMYLPHENOL MARKET ANALYSIS, BY REGION, 2017-2027 (US$ MN & TONS)

© Coherent Market Insights. All Rights Reserved

GLOBAL 4-TERT-AMYLPHENOL MARKET OUTLOOK, BY REGION (1/3)

Key Takeaways

- North America held a market share of 34.1% in terms of revenue in 2019 in the global 4-tert-amylphenol market. There is increasing demand for plastic additives, owing to growing polymer industry in this region. Increasing application of engineered polymers in various end-use industries such as construction and automotive industry is driving growth of the global plastics & polymers industry, thereby aiding in growth of the 4-tert-amylphemol market. Rapid demand for polyethylene, polypropylene, and polystyrene in packaging and automotive industries is a key factor driving growth of the market. For instance, according to Plastics Trade Association, in 2014, the plastic industry was the third largest manufacturing sector in the U.S. The country's deficit in plastic products increased from US$ 6.1 billion in 2013 to US$ 6.8 billion in 2014.

- In the U.S., 4-tert-amylphenol was an active ingredient in some of the registered cleanroom disinfectant products. The U.S. Environmental Protection Agency (EPA) issued a Data Call-In (DIC) on December 2018, for this active ingredient. Through this DIC, EPA require U.S. suppliers to discontinue selling of disinfectant products with 4-tert-amylphenol due to environmental policy. This is hindering the growth of this market in North America region and has also affected the global market for PTAP.

- Latin America registered a CAGR of 3.6% in terms of value during 2020 – 2027, owing to growth of agriculture sector in the region. For instance, according to report, 'OECD-FAO Agricultural Outlook 2019-2028', published by Organization for Economic Co-operation and Development (OECD) Publishing and Food and Agriculture Organization of the United Nations in 2019, Latin America and the Caribbean (LAC) together accounted for 14% of the global production and 23% of the world's exports of agricultural and fisheries commodities in 2018.

Source: Coherent Market Insights, 2019-20

© Coherent Market Insights. All Rights Reserved

GLOBAL 4-TERT-AMYLPHENOL MARKET OUTLOOK, BY REGION (2/3)

Key Takeaways

- Furthermore, according to research article, 'The dilemma of agricultural pollination in Brazil: Beekeeping growth and insecticide use', published by Journal of PLoS ONE in 2018, Brazil is a world leader in agricultural production. Therefore, growth of agricultural sector in Latin America is expected to increase demand for pesticides, thereby boosting growth of the 4-tert-amylphenol market in the region over the forecast period.

- Europe accounted for 25.8% market share in terms of value in global 4-tert-amylphenol market in 2019. 4-tert-amylphenol belongs to alkylphenols group. These chemicals may effect on endocrine systems in wildlife and people, restraining the growth of this market. It is used as a chemical intermediate in Europe (mainly for phenolic resins). The stringent government regulations related to 4-tert-amylphenol in Europe is hindering the growth of this market. The use of 4-tert-amylphenol in disinfectant is subjected to the Biocidal Products Regulations 2001 (Statutory Instrument 2001/880), which implement the EU Biocidal Products Directive (98/8/EC). The industry has not supported the continue use of 4-tert-amylphenol as an active substance in disinfectant application, and by September 2006, the disinfectant products containing this chemical had to be removed from the market, restraining the growth of this market in Europe.

- Asia Pacific held a market share of 36.6% in terms of revenue in 2019 in the global 4-tert-amylphenol market. The growth is attributed to growing rubber and plastic industry in emerging economies such as China and India in this region. For instance, according to India Brand Equity Foundation (IBEF), in India, the natural rubber production increased 23% during 2016-2017 and reached 690,000 tons.

© Coherent Market Insights. All Rights Reserved

GLOBAL 4-TERT-AMYLPHENOL MARKET OUTLOOK, BY REGION (3/3)

Key Takeaways

- Asia Pacific is projected to witness relatively high growth in terms of value over the forecast period. According to IBEF, US$ 7.64 billion was generated by the Indian plastic industry in 2015-16. This included exports to countries such as U.S. (US$ 898.45 million), UAE (US$ 422.74 million), Saudi Arabia (US$ 169.1 million), China (US$ 489.25 million), U.K. (US$ 287.68 million), Germany (US$ 290.03 million), Italy (US$ 286.9 million), Bangladesh (US$ 184.33 million), Turkey (US$ 285.23 million), and Nepal (US$ 161.09 million).

- Middle East and Africa held a market share of 1.1% in terms of revenue in 2019 in the global 4-tert-amylphenol market. The growth of the agricultural industry in Africa is expected to result in rising demand for efficient crop protection products, which, in turn, is expected to propel demand for 4-tert-amylphenol in the region over the forecast period.

- For instance, according to Agricultural survey-2017 published by Statistics South Africa (Stats SA - the national statistical service of South Africa) in 2018, the total income earned in the agriculture and related services industry was US$ 21.13 billion in 2017 compared to US$ 19.40 billion in 2016, indicating an increase of 8.9% income between 2016 and 2017. Moreover, as per the same source, in 2017, the total expenditure incurred by the farming sector in South Africa was US$ 19.37 billion compared to US$ 18.15 billion in 2016 (an increase of 6.7%).

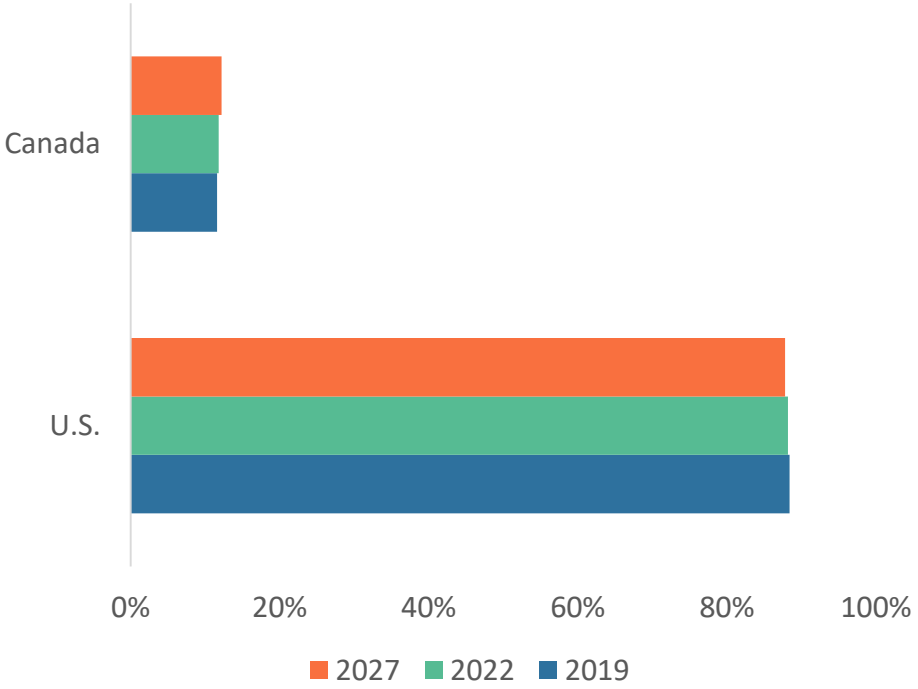
NORTH AMERICA 4-TERT-AMYLPHENOL MARKET REVENUE SHARE, BY COUNTRY

Canada accounted for the smallest market revenue share in the North America 4-tert-amylphenol market in 2019



- Canada accounted for 11.6% revenue share in the North America 4-tert-amylphenol market in 2019 and is expected to reach 12.2% by 2027
- The U.S. accounted for 88.4% revenue share in the North America 4-tert-amylphenol market in 2019 and is expected to reach 87.8% by 2027

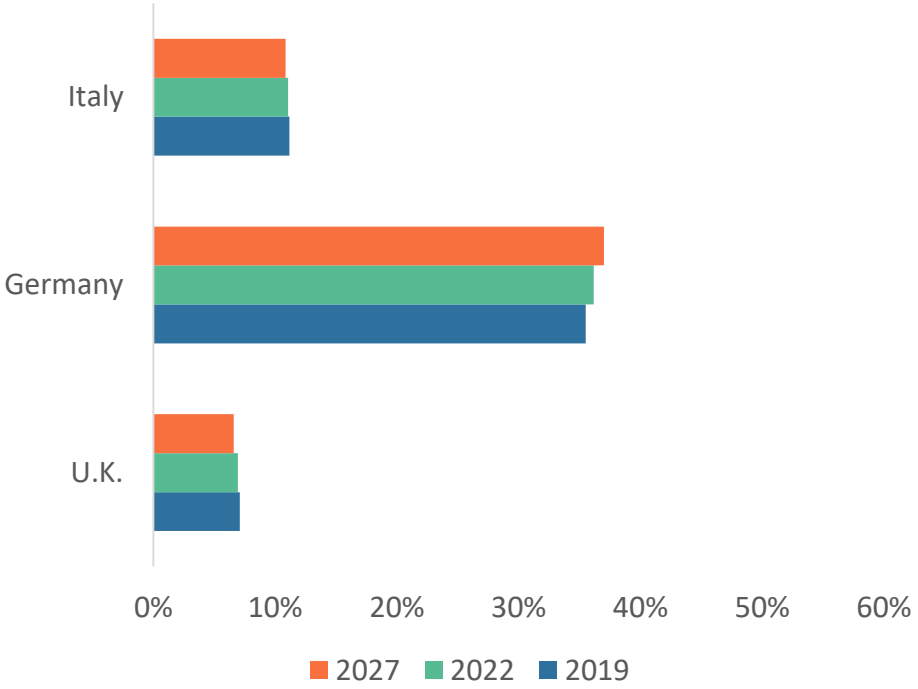
EUROPE 4-TERT-AMYLPHENOL MARKET REVENUE SHARE, BY COUNTRY (1/2)

Rest of Europe accounted for the largest market revenue share in the Europe 4-tert-amylphenol market in 2019



- Italy accounted for 11.3% revenue share in the Europe 4-tert-amylphenol market in 2019 and is expected to reach 11.0% by 2027
- Germany accounted for 33.5% revenue share in the Europe 4-tert-amylphenol market in 2019 and is expected to reach 34.9% by 2027
- U.K. accounted for 7.2% revenue share in the Europe 4-tert-amylphenol market in 2019 and is expected to reach 6.7% by 2027

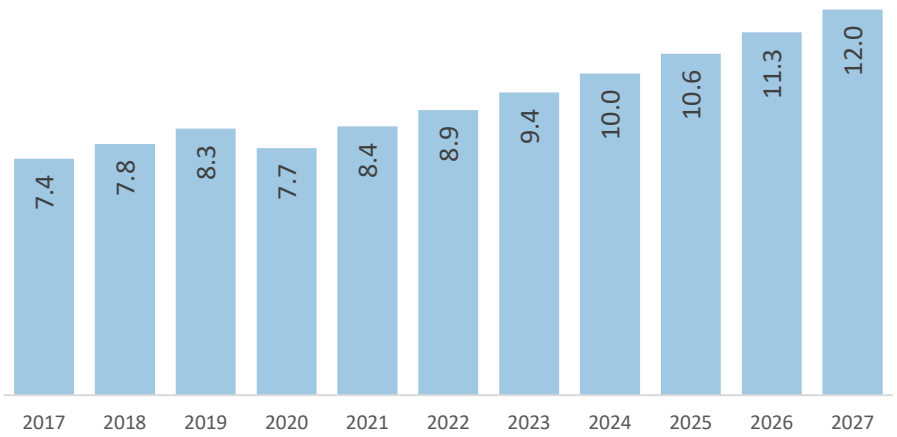
SECTION 7.4

ASIA PACIFIC 4-TERT-AMYLPHENOL MARKET ANALYSIS, 2017-2027 (US$ MN & TONS)

© Coherent Market Insights. All Rights Reserved

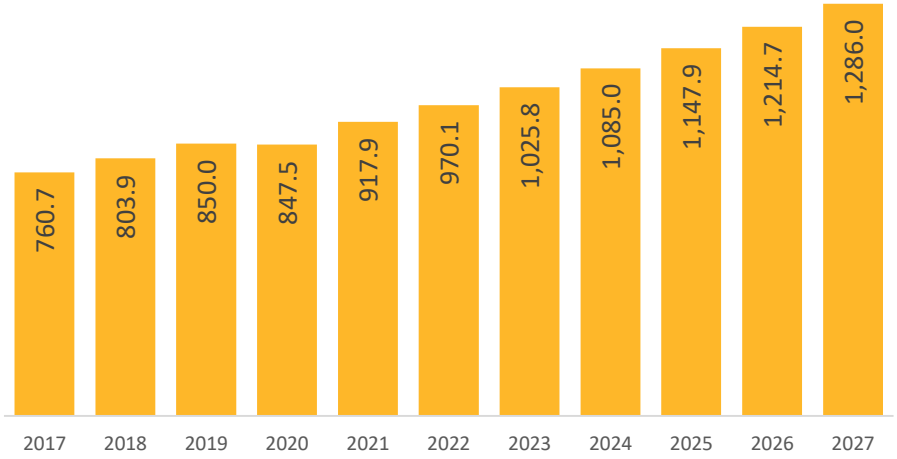
Asia Pacific is expected to generate US$ 12.0 Mn in the global 4-tert-amylphenol market in 2027

FIGURE 1 Asia Pacific 4-Tert-Amylphenol Market Value (US$ Mn) Analysis and Forecast



- Asia Pacific 4-tert-amylphenol market was valued at US$ 8.3 Mn in 2019 and is projected to increase to US$ 12.0 Mn by 2027, witnessing a CAGR of 6.6% during the forecast period

FIGURE 2 Asia Pacific 4-Tert-Amylphenol Market Volume (Tons) Analysis and Forecast



- Asia Pacific 4-tert-amylphenol market was pegged at 850.0 Tons in 2019 and is projected to increase to 1,286.0 Tons by 2027, witnessing a CAGR of 6.1% during the forecast period

SI GROUP

COMPANY INTRODUCTION

KEY DEVELOPMENTS

COMPANY DETAILS

COMPANY NAME	SI Group
ESTABLISHED	1906
HEADQUARTERED	Schenectady, U.S.
KEY MANAGEMENT (CEO)	Mr. David A Bradley
KEY GEOGRAPHIC OPERATIONS	North America, Europe, Asia Pacific, Middle East, and Latin America
EMPLOYEE STRENGTH (2018)	~2,800

COMPANY OVERVIEW

- SI Group is a developer and manufacturer of chemical intermediates, specialty resins, and solutions for production of industrial and consumer goods
- The company has market presence worldwide in different market segments such as rubber resins, fuels and lubricants, plastic additives, industrial resins, adhesive resins, surfactants, and engineering plastics
- The company produces and delivers a range of products used for manufacturing various products such as rubber, adhesives, industrial resins, surfactants, engineering plastics, fuels, lubricants, and plastic additives

ACROS ORGANICS

COMPANY INTRODUCTION

COMPANY DETAILS

COMPANY NAME	Acros Organics
ESTABLISHED	1994
HEADQUARTERED	Antwerp, Belgium
KEY MANAGEMENT (CEO)	Mr. Mark Casper
KEY GEOGRAPHIC OPERATIONS	North America, Europe, Asia Pacific, Middle East, Africa, and Latin America
EMPLOYEE STRENGTH (2019)	~200

COMPANY OVERVIEW

- Acros Organics manufactures chemicals for organic, medical, analytical and biochemistry applications. The company is a subsidiary of Thermo Fisher Scientific Group.
- The company offers biochemical & reagents, building blocks, essential chemicals, inorganic salts, and synthetic reagents.
- The company currently has a portfolio of over 30,000 products. The company offers products for research and industrial applications.

APOLLO SCIENTIFIC LTD

COMPANY INTRODUCTION

COMPANY DETAILS

COMPANY NAME	Apollo Scientific Ltd
ESTABLISHED	1993
HEADQUARTERED	Stockport, U.K.
KEY MANAGEMENT (CEO)	Mr. Neil Hamilton
KEY GEOGRAPHIC OPERATIONS	North America, Europe, and Asia Pacific
EMPLOYEE STRENGTH (2019)	~200

COMPANY OVERVIEW

- Apollo Scientific Ltd is a manufacturer and distributor of research chemicals which offer aromatic, heterocyclic, aliphatic compounds, fluorochemicals and life science reagents.
- Apollo Scientific Ltd has manufacturing facilities in the U.K., Germany, Japan, and the U.S. The company's facility in Germany offers development and up scaling of products as well as custom synthesis for pre-clinical trial studies, production of commercial APIs and intermediates. The U.S. based facility specializes in gases, fluorinated gases, and aliphatic fluorochemistry.

RESEARCH METHODOLOGY

© Coherent Market Insights. All Rights Reserved

RESEARCH PROCESS

Our research is an optimum culmination of secondary and primary research, with the latter playing a major role. We also have an in-house repository and access to a number of external regional and global paid databases to help address specific requirements of our clients. The research process begins with a holistic secondary research, followed by expert interviews. The information gathered is then comprehensively analyzed by our highly experienced in-house research panel.

PROPOSAL & MARKET TAXONOMY	MARKET ANALYSIS	MARKET EVALUATION & FORECASTING	DATA VERIFICATION AND VALIDATION	SERVICE/REPORT LAUNCH
▪ Market Scope ▪ Technical Analysis ▪ Market Taxonomy ▪ Prospect Database	▪ Future Growth Prospects ▪ Market Trend Analysis ▪ Competitive Landscape ▪ Absolute dollar opportunity ▪ Ecosystem Analysis ▪ Regional Trends and Analysis	▪ Historic Data ▪ Current Market Size ▪ Future Market Potential	▪ Primary Research ▪ Data Standardization ▪ Expert Panel Interviews ▪ Response Analysis ▪ Holistic analysis using Data Triangulation Methodology	▪ Press Release ▪ Whitepaper ▪ Social Media ▪ Campaigns Consultation
• Pilot Prospect		• Reconsideration • Value Addition
