SECTION 1

GLOBAL AIOps PLATFORM MARKET

- Research Objective
- Assumptions
- Abbreviations

RESEARCH OBJECTIVE

This report studies the current scenario as well as the future market potential for AIOps platform across the globe. The market for the same has been segmented on the basis of component, organization size, vertical, and region.

Key features of the study:

- This report provides in-depth analysis of the AIOps platform market and provides market size (US$ Bn) and compound annual growth rate (CAGR) (%) for the forecast period (2018 – 2026)
- It elucidates potential revenue opportunity across different segments and explains attractive investment proposition matrix for this market. It provides valuable insights about market drivers, restraints, opportunities, new product launches, regional outlook, and competitive strategies adopted by the leading players.
- It profiles leading players in the global AIOps platform market based on the following parameters – company overview, financial performance, product portfolio, geographical presence, key developments, and future plans
- Insights from this report would allow marketers and the management authorities of the companies to make informed decisions with respect to their future product launches, market expansion, and marketing tactics
- The global AIOps platform market report caters to various stakeholders in this industry, including investors, product developers, merchants, commercial enterprises, research institutes, new entrants, and financial analysts
- Stakeholders would greatly benefit in decision-making through various strategy matrices used in analyzing the AIOps platform market

ASSUMPTIONS

- **Market & Forecast :**
  - Changes in the inflation rate has not been considered while forecasting market numbers
  - Macroeconomic indicators such as GDP, end-use vertical business scenarios, regulatory decisions, and unit prices have been considered to arrive at the market estimates
  - Secondary axis represents Y-o-Y growth
  - Bottom-up approach has been followed to assess market numbers for type of segment
  - Top-down approach has been used to counter-validate the estimated numbers for each segment
- **Currency :**
  - All the values estimated are in US$ (U.S. Dollar)
- **Scope :**
  - Actual/Base Year - 2017
  - Year of Estimation – 2018
  - Forecast Period – 2018 to 2026

Source: Coherent Market Insights, 2017-18

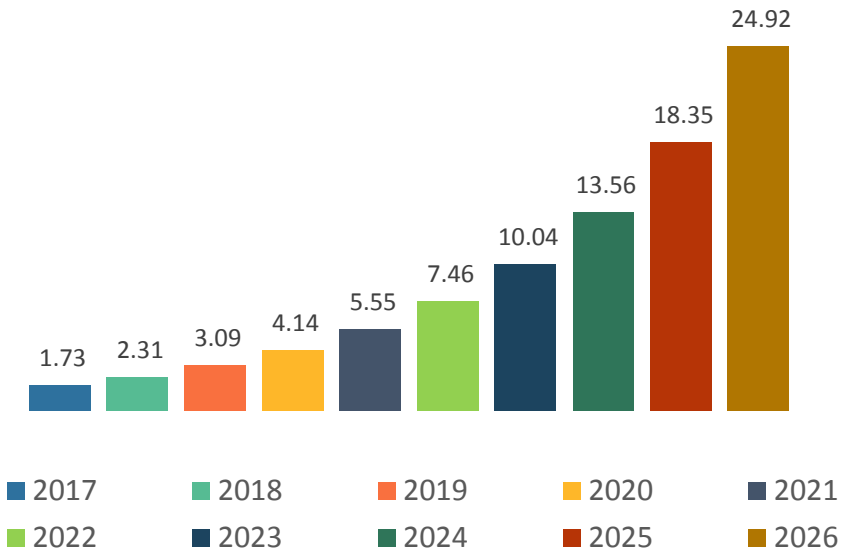
SECTION 2

GLOBAL AIOps PLATFORM MARKET

- Report Description
  - Market Definition and Scope
- Executive Summary
  - Market Snippet, By Component
  - Market Snippet, By Organization Size
  - Market Snippet, By Vertical
  - Market Snippet, By Region
- Coherent Opportunity Map (COM)

MARKET OVERVIEW

Figure:2.1 **Global AIOps Platform Market Value (US$ Bn) Analysis and Forecast, 2017-2026**



34.6% Projected growth of global AIOps platform market between 2018 and 2026

- Global AIOps platform market is estimated to be valued at US$ 2.31 Bn in 2018, up from US$ 1.73 Bn in 2017. By 2026, the market is projected to reach US$ 24.92 Bn, exhibiting a CAGR of 34.6% over the forecast period (2018–2026).
- The global AIOps platform market is segmented on the basis of component, which includes platform and services. On the basis of organization size, it is segmented into SMEs and large enterprises. On the basis of verticals, it is segmented into banking financial services & insurance, healthcare and life sciences, retail & consumer goods, IT & telecom, government, manufacturing, media & entertainment, and others.
- Increasing demand for AIOps in IT industry, rising shift of companies towards core cloud business, increasing demand for data storage and management for large quantity of data, and increasing demand & adoption of SaaS are some of the major factors driving growth of global AIOps platform market.

MARKET OVERVIEW: TOP THREE FINDINGS

- Across Asia Pacific AIOps platform market, during 2018-2026, India is expected to grow at significant rate over the forecast period, followed by South Korea. This growth is attributed to increasing number of start-up companies and increasing adoption of AIOps platforms by new as well as existing companies for automation and real-time monitoring & analytics of their ongoing operations for cost and time savings.

- North America held dominant position in the global AIOps platform market in 2017 and is projected to retain its dominance throughout the forecast period. The U.S. is a major growth engine of this region. High presence of SMEs and large enterprises is a major factor driving growth of the market in this region. According to Coherent Market Insights' analysis, in 2017, North America accounted for 32.1% of the total AIOps platform market globally. Moreover, the trend of integration of AI tools and development platforms are also expected to aid in growth of AIOps platform market.

- Among organization size, large enterprises segment accounted for the largest share in the global AIOps platform market in 2017 and is expected to retain its dominance over the forecast period with a CAGR of 32.4%, owing to increasing automation of existing companies for automated machine learning and rising demand for real-time data analytics & monitoring for maximum output in their operations.

MARKET OVERVIEW: TOP OPPORTUNITIES

- AIOps platform has opportunities in the e-commerce industry for management of demand and supply of retail products. AIOps platform helps to track the demand (no. of product searches) and availability of products in stock for supply in any particular region. This will help to develop a real-time tracking of demand and supply for the e-commerce retailers.
- In Asia Pacific region, increasing number of SMEs, rapid development of corporate companies, developing infrastructure, and increasing adoption of software-as-a-service (SaaS) are some of the factors that are expected to aid in growth of AIOps platforms market in the region during the forecast period
- AIOps platform has opportunity to diversify into algorithmic intelligence for IT operations in manufacturing sector for efficient intelligent remediation to improve overall production efficiency of all the teams working together

SECTION 3

GLOBAL AIOps PLATFORM MARKET

- Market Dynamics
  - Drivers
  - Restraints
  - Opportunities
- Key Trends
- Mergers, Partnerships, and Collaborations
- New Products Approvals/Launches

INCREASING DEMAND FOR AIOps IN IT INDUSTRY

1

- AIOps can bring a significant impact on system operations and administration by increasing IT efficiency, improving service delivery, and bringing superior user experience. It helps the managers to differentiate between legitimate signals and inconsequential noise. AIOps uses data analytics, machine learning, and big data to process a high level automation and reduces the requirement of human operators, which is needed for the management tasks for modern infrastructure and software requirements in the IT industry.
- AIOps collects the data from various resources and enables access to the users for better interference with automation on the stored data

INCREASING SHIFT OF ORGANIZATIONS TO CORE CLOUD BUSINESS

2

- Introduction of AIOps platforms are pushing the existing companies and new entrants to shift towards cloud-based business, as AIOps plays a key role in the security of IT infrastructure, which impacts both the cloud infrastructure management and enterprise data center
- High demand for AIOps in cloud computing service models such as Infrastructure-as-a-Service (IaaS), Platform-as-a-Service (PaaS), and Software-as-a-Service (SaaS) for computing, storage, networking, and accessing the application through web portal on pay-per-use basis is aiding in growth of the AIOps platform market.

Source: Coherent Market Insights, 2017-18

© Coherent Market Insights. All Rights Reserved

INCREASING DATA STORAGE AND QUANTITY OF DATA, AND DEMAND FOR DATA MANAGEMENT

3

- Companies have large amount of data and information of their business, which has to be managed and stored in an efficient way. Increasing demand of leveraging those data in a short period of time by analyzing it according to the requirements of the operations is fulfilled by AIOps platforms, which uses big data, machine learning, and data analytics to provide a better interference and accessibility of those data to the user in a very short span of time.
- AIOps also helps to identify and analyze the threat on data storage & access of data and helps to cure the same at the time of operations and data management

INCREASING DEMAND AND ADOPTION OF SAAS

4

- Rising adoption of Software-as-a-Service is boosting demand for AIOps throughout the industry. This is owing to increasing demand for cost savings and monitoring of operations for efficient results. According to Coherent Market Insights' analysis, the adoption of SaaS reached around US$ 20 billion per quarter of 2018 and is increasing around 32% every year. Therefore, rising adoption of SaaS is aiding in growth of the AIOps platforms market.
- Increasing development in SaaS due to innovations in the platforms by SaaS providers, as they have access to different databases and monitor its users is increasing implementation of AIOps in different SaaS platforms, thereby aiding in growth of the market

Source: Coherent Market Insights, 2017-18

LACK OF SKILLED PROFESSIONALS

1

- Operators in AIOps platform must understand the following terminologies and how to deal with them in case of any problem:
  - Data Management
    - Historical data management and streaming data management
  - Data Ingestion
    - Log data ingestion, wire data ingestion, and metric data ingestion
  - Prediction
    - Automated pattern discovery & prediction, and anomaly prediction
  - Document text ingestion
  - Root cause determination
  - On-premise delivery
  - Software-as-a-Service
- It is very necessary for the operator to understand about all the problems mentioned above to operate and handle the platform for any operation

INCREASING COMPLEXITY OF IT ARCHITECTURES

2

- Rapidly changing IT architecture technologies, owing to digital transformation of business and increasing demand for automation in siloed IT operations is one of the factors restraining growth of the AIOps platforms market. Increasing complexity in IT architecture due to advancements in technologies, in order to separate and manage the different operations and transactions are pushing the overall digitalization and automation process.

MARKET OPPORTUNITIES

GLOBAL AIOps PLATFORM MARKET

ALGORITHMIC INTELLIGENCE FOR IT OPERATIONS IN MANUFACTURING INDUSTRY

- AIOps platforms and tools can use previously stored data to improve intelligent remediation over a short span of time to improve the overall production efficiency for all the teams working together
- The incident resolution process can be much effectively modified and managed through intelligent remediation, which helps in reduction of production time and provides automated identification and solution of the root cause

OPPORTUNITY TO BROADEN THE SCOPE OF E-COMMERCE RETAIL INDUSTRY

- Increasing adoption of AI in e-commerce industry for tracking the products searched by customers and monitoring of operations such as comparison between product searches and availability of products in stock for the management of real-time demand & supply is aiding in growth of the AIOps platform market
- AIOps can help e-commerce retailers in many ways such as augment search and automate supply chain by tracking the demand and supply of products

Source: Coherent Market Insights, 2017-18

© Coherent Market Insights. All Rights Reserved

1 ADOPTION OF AIR TRAFFIC CONTROL SYSTEM FOR IT OPERATIONS

- Rising adoption of machine learning platform and data analysis to enhance the existing internal management systems are fueling the adoption of AIOps platforms for IT operations. IT decision-makers are taking advantage of AIOps capabilities to gain more meaningful insights related to system alerts, as it reduces IT administrator's work load by automating manual tasks to resolve IT performance issues.

- For instance, in August 2018, San Diego-based OpsRamp company offered an AIOps inference engine as a cloud-based ‘air-traffic control’ system for IT operations. This is the hybrid management platform for the modern enterprise, which enables the digital operation teams to take responsive action sooner, discover hybrid assets, and optimize their environments. This unified platform allows IT organizations to act like a service provider to the business and helps to accelerate the digital transformation. The IT experimenters use the hybrid management platform to sort through and prioritize the operational alerts.

2 INTEGRATION OF AI TOOLS AND DEVELOPMENT PLATFORMS TO TAKE REAL-TIME DECISIONS

- AIOps platform apply real-time artificial intelligence system to deliver proactive insights about problems and recommends automated remedial actions. AIOps platforms analyze large volumes of data from disparate sources, by applying various types of algorithms to the data in real time to provide a real-time pattern discovery. This helps in getting real-time analysis and diagnosis of issues, and actionable insights. By leveraging AIOps platforms, IT organizations can enhance and automate IT operational practices and access continuous insights about performance of their business services.

- For instance, Alibaba Cloud’s ET Brain platform combines multiple AI and Big Data capabilities to offer multi-source large-scale processing that improves pro-activeness in decision making. ET Brain helps the organization to take real-time decisions with reasoning algorithms and drive the innovation with machine learning approaches. The applications such as utilize voice recognition, facial recognition, and image recognition can leverage Alibaba Cloud’s Big Data platforms, MaxCompute, and DataWorks, for analyzing complex and large volumes of data in real-time. This advanced AI-powered system coupled with image recognition and optical character recognition capabilities can also double check all the data and ensure reduction of errors.

RISING ADOPTION OF AIOps PLATFORM IN IT AND TELECOM INDUSTRY TO PROVIDE BETTER CUSTOMER SERVICES

3

- In IT and telecom industry, AIOps platform can offer a better 24/7 customer service through automation service. If companies use 24/7 chatbots, many issues of customers can be resolved and can get quick responses with the help of a ticketing system having machine learning technology. The algorithms from machine learning platform can identify faults with the context of historical information, server ticket data, and network log. The combination of operations support systems can further help in avoiding on-site maintenance, reducing the personal technician visits, and material shifts. Thus, business would gain maximum profit.

- For instance, in March 2017, [24]7.ai, a customer experience software and services company that uses artificial intelligence and machine learning to understand consumer intent, announced that its intelligent chatbot technology, [24]7 Virtual Agent, leads the market with over 500 intelligent chatbot deployments across various industries including healthcare, insurance, retail, banking, telecom, travel, and utilities, to enhance the digital customer experience. This intelligent chatbot helps the consumers to find out information they need, by delivering automated answers and complete transactions. Therefore, AIOps platform plays a key role in the telecom industry.

INCREASING USAGE OF AIOps PLATFORMS IN MEDICAL DIAGNOSTICS AND HOSPITALS

4

- AIOps platform aids in use of AI in diagnostics sector to enhance accuracy, early detection of disease, remove friction from workflows, and increase efficiency across the business. AI-based systems are helpful in hospitals for the improvement of operational workflows and management of data. Smart AI systems and machine learning algorithms can compare a medical image using image recognition with those of millions of other patients, picking up on nuances that might be missed by a human eye.

- For instance, SkinVision, consumer-focused AI monitoring tool, uses computer vision to monitor suspicious skin cancer at an early stage. Therefore, healthcare AI applications will aid in enhancing machine learning capabilities in clinics and hospitals. Moreover, in February 2018, AstraZeneca declared a partnership with Alibaba's subsidiary Ali Health to develop AI-assisted screening and diagnostics applications in China.

MERGERS, PARTNERSHIPS, AND COLLABORATIONS

- In April, Splunk Inc. acquired Phantom Cyber, a company that offers security orchestration, automation, and response capabilities that enable security teams to drastically scale their operation efforts.

- In July, Broadcom Inc., a key semiconductor device supplier, and CA Technologies announced that the companies have entered into a definitive agreement under which Broadcom agreed to acquire CA to build one of the world's leading infrastructure technology companies.

- In September, Micro Focus acquired Hewlett Packard Enterprise for US$ 8.8 billion. The acquisition helped Micro Focus by enhancing its portfolio in DevOps, risk analysis, hybrid IT, and predictive analysis.

- In October, Splunk Inc. acquired SignalSense Inc., a privately held technology company that offers cloud-based advanced data collection and breach detection solutions that leverage machine learning.

NEW PRODUCTS APPROVALS/LAUNCHES

Product	Company	Launch Year	Description
Watson Assistant	International Business Machines Corporation	2018	Watson Assistant helps businesses to enhance their brand loyalty and transform customer experiences while keeping the data private and secure
ITOM platform	Micro Focus International plc.	2018	This new ITOM platform helps in tackling challenges of hybrid IT
AIOps platform "Observe"	Moogsoft Inc.	2018	Observe helps in enabling trend and historical analysis of relevant, meaningful data and it helps in lowering cost and with significantly reduced latency by reducing the time to detect a problem.
Cognitive Orchestrated Process Autonomics (COPA)' Platform	HCL Technologies Limited	2017	This is a AI-powered process transformation platform and consulting offerings
Vertica 9	Micro Focus International plc.	2017	This upgraded version of Vertica, Vertica 9 consists of unified advance analytics database features

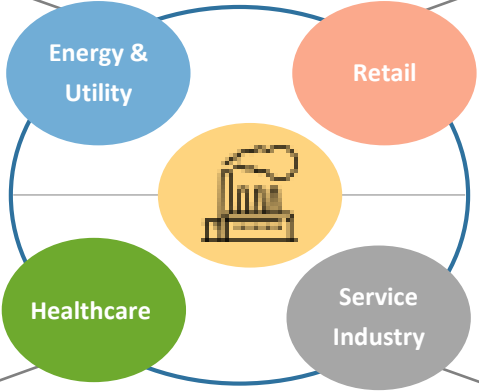
Customer Reviews by End-use Industries



"The overall implementation was good, but being a perpetual license holder of BMC, it was with some disappointment we have to accept license uplift fees. "

IT Technical Consultant

"The product was easy to install and it is used from a consumer prospective. It is a good solo operation management tool, but we face several challenges related to integration "

IT Technical Consultant

"The overall process of platform installation and configuration are excellent. This tool effectively manages the monitoring process of our overall business operations. The product offers exceptional user experience, and the scalability of the product is excellent . "

System Administration

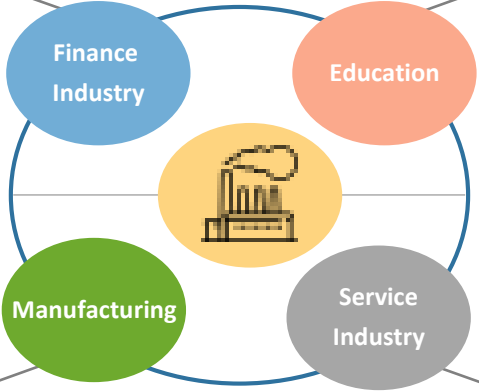
"The installation process, scalability, and stability of AIOps platform was good. The upgrades of this platform are still somehow complex."

Team Manager

Source: Secondary and Primary Research, Coherent Market Insights, 2017-18

© Coherent Market Insights. All Rights Reserved

Customer Reviews by End-use Industries



"The implementation of AIOps platform went smooth, but better monitoring is required. We have installed this product to improve business process outcomes, agility, and drive product innovation"

Business Analyst

"The overall implementation went well, but continued checkpoints are needed across the implementation phase"

IT Technical Consultant

"It is a powerful and effective tool, which helps to improve the efficiency of any company in a remarkable way. "

Chief of Operations

"The deployment of the platform was great, as these platforms help our service deck to manage incidents and handling service requests efficiently."

Operation Manager

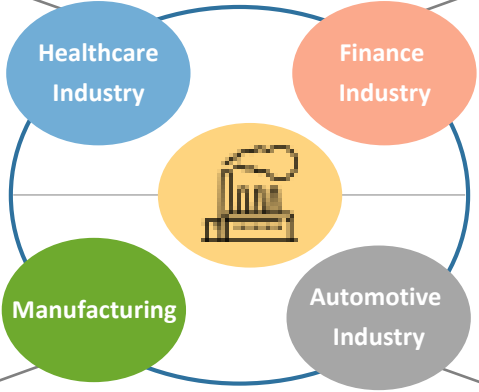
Customer Reviews by End-use Industries



"Smooth implementation and outstanding support along with excellent customer support"

Operations Manager

"Fantastic IT operations management solutions to handle users requirements"

Chief of Operations

"The implementation of this product helped the company to ramp-up the overall operational efficiency."

Infrastructure & Operations Manager

"Comprehensive IT Service Management solutions adhering all ITIL processes"

Operation Manager

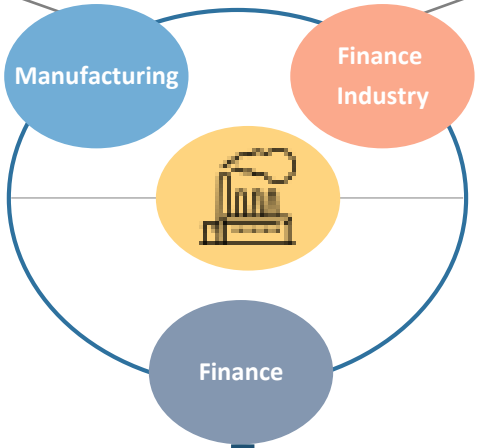
Source: Secondary and Primary Research, Coherent Market Insights, 2017-18

© Coherent Market Insights. All Rights Reserved

Customer Reviews by End-use Industries

"The solutions is very comprehensive, reliable, and flexible, which helps us to meet complex business needs of large enterprises "

Operations Manager



"Easy implementation of solution and outstanding interactions with vendor team to support our requirements "

Head of IT Tools

"IT operations management solutions helps our enterprises to handle user's requirements efficiently "

Chief of Operations

Customer Reviews by End-use Industries

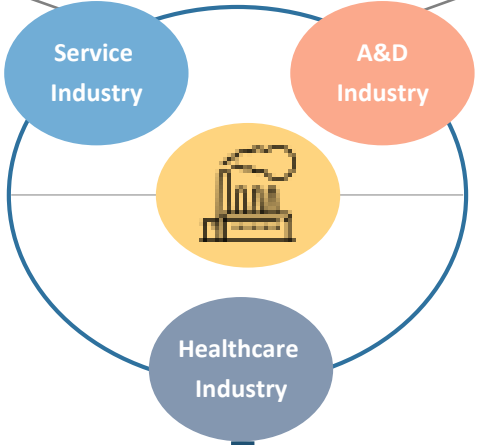
"Splunk Enterprise gives us a competitive edge by bringing to light analytics and insights buried in logs and other data sources. This intelligence gives us real time awareness of how our platform is performing and the agility to quickly improve and optimize our applications and services"
"

Technical Head



""Using Splunk Enterprise and Splunk ITSI has helped us to understand our IT network in a way we weren't able to previously. This has directly led to improvements in areas such as troubleshooting and security awareness, which is allowing us to focus more on how we can support our engineers and researchers."

Chief Technology Officer

"Splunk ITSI ensures customer satisfaction by giving us service-centric health reporting, end-to-end visibility and advanced analytics to detect patterns, anomalies, and trends."

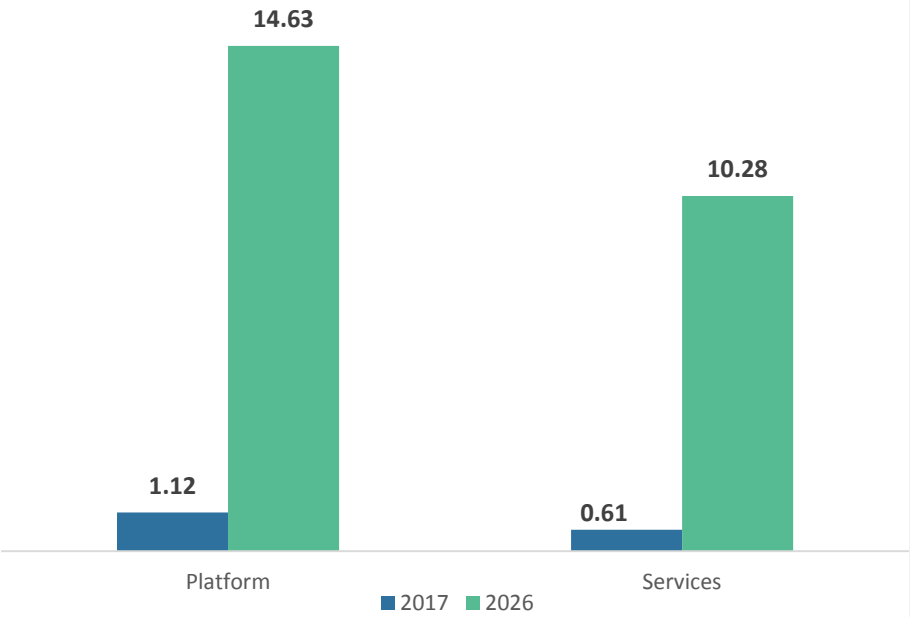
SECTION 5

GLOBAL AIOps PLATFORM MARKET, BY COMPONENT

- Solution
- Services

THE SERVICES SEGMENT IS EXPECTED TO EXHIBIT HIGH GROWTH OVER THE FORECAST PERIOD

FIGURE 5.1 Global AIOps Platform Market Value (US$ Bn) Comparison, by, 2017 & 2026



- On the basis of component, the global AIOps platform market is segmented into solution and services
- In 2017, platform segment held the dominant position in the market and is expected to retain its dominance throughout the forecast period. In 2018, the solutions segment generated revenue of US$ 1.48 Bn and is expected to reach US$ 14.63 Bn by 2026 with a CAGR of 33.2% over the forecast period.
- Moreover, the services segment is expected to exhibit the highest CAGR over the forecast period. In 2017, the services segment generated revenue of US$ 0.61 Bn and is expected to reach US$ 10.28 Bn by 2026 with a CAGR of 36.9% over the forecast period.

Source: Secondary and Primary Research, Coherent Market Insights, 2017-18

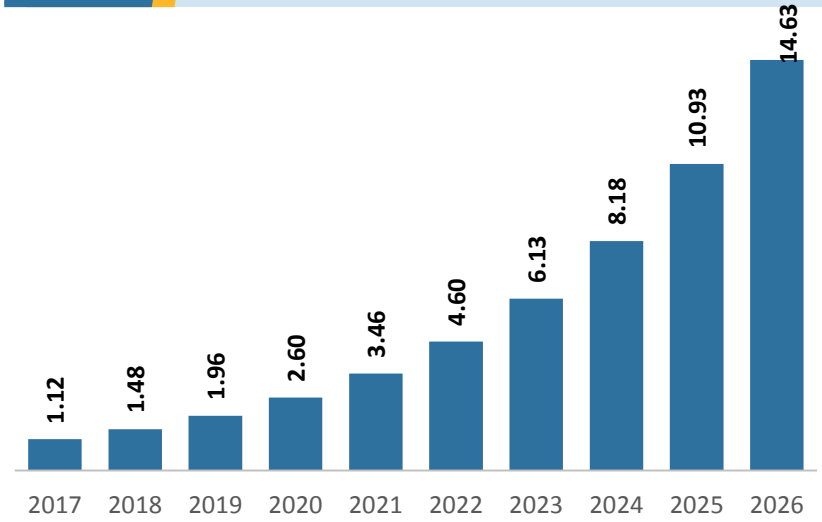
SECTION 5.1

GLOBAL AIOps PLATFORM MARKET, BY PLATFORM

- Segmental Analysis

PLATFORM SEGMENT GENERATED REVENUE OF US$ 1.12 BILLION IN 2017

FIGURE 5.1.1 Global AIOps Platform Market Value (US$ Bn) Analysis and Forecast, by Platform



33.2% projected growth rate of platform segment between 2018 and 2026

- In 2017, the platform segment generated the revenue of US$ 1.12 Bn and is expected to reach US$ 14.63 Bn by 2026, with a CAGR of 33.2% over the forecast period.
- The AIOps refers to a multi layered technology platform that mechanize and enhance IT operations by integrating machine learning and analytics solutions. It analyzes the big data collected by various IT operations tools and devices in order to detect the query and solve it in real time. Increasing demand to address the speed, scale, and complexity challenge of digital transformation have accelerated growth of the AIOps for IT operations.
- Moreover, increasing demand for real time data processing for streaming IT data in IT companies is one of the major factor propelling demand for modern big data platform. For instance, Hadoop 2.0, Elastic Stack etc. Hence, increasing demand for modern big data platform have accelerated the segment growth in the global market.

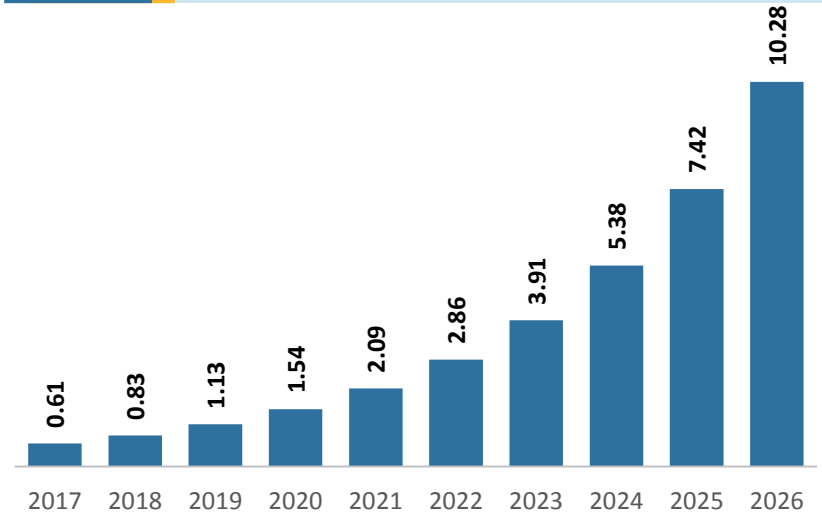
SECTION 5.2

GLOBAL AIOps PLATFORM MARKET, BY SERVICES

- Segmental Analysis

SERVICES SEGMENT GENERATED REVENUE OF US$ 0.61 BILLION IN 2017

FIGURE 5.2.1 Global AIOps Platform Market Value (US$ Bn) Analysis and Forecast, by Service



36.9% projected growth rate of service segment between 2018 and 2026

- In 2017, the services segment generated the revenue of US$ 0.61 Bn and is expected to reach US$ 10.28 Bn by 2026, with a CAGR of 36.9% over the forecast period.
- Increasing innovation of new technologies such as AIOps applications which permits IT professionals to operate and expand in more complex and heterogeneous business environments have accelerated the demand for services segment in the market. These services refer to the outsourcing in-house functionalities, so that they are managed by third party services providers such as integration, consulting, and maintenance of deployed solutions.

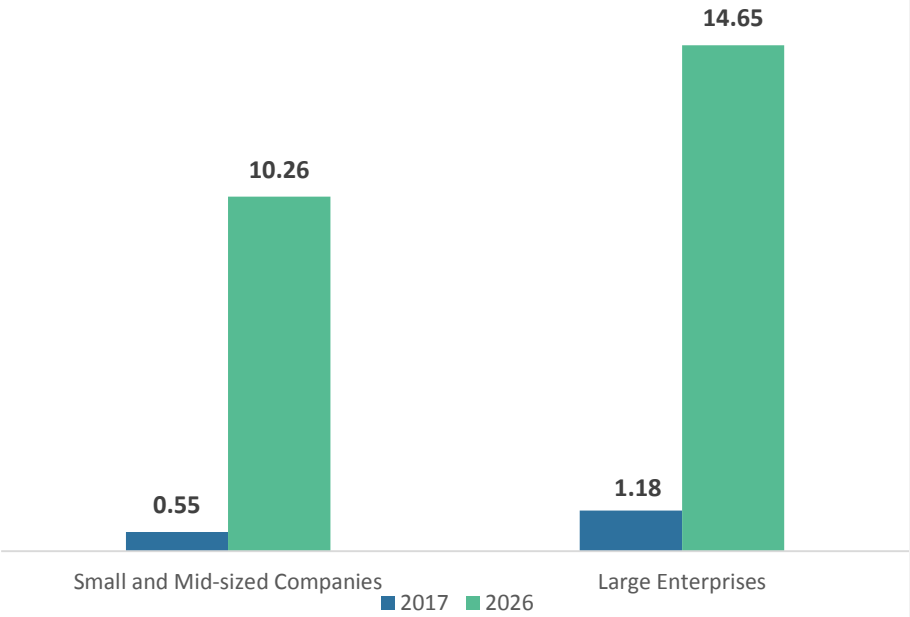
SECTION 6

GLOBAL AIOps PLATFORM MARKET, BY ORGANIZATION SIZE

- Small and Medium-Sized Companies
- Large Enterprises

THE SMALL AND MID-SIZED COMPANIES SEGMENT IS EXPECTED TO EXHIBIT HIGH GROWTH OVER THE FORECAST PERIOD

FIGURE 5.1 Global AIOps Platform Market Value (US$ Bn) Comparison, by Organization Size, 2017 & 2026



- On the basis of organization size, the global AIOps platform market is segmented into small and mid-sized companies and large enterprises.
- In 2017, large enterprises segment held the dominant position in the market and is expected to retain its dominance throughout the forecast period. In 2017, the large enterprises segment generated revenue of US$ 1.18 Bn and is expected to reach US$ 14.65 Bn by 2026, with a CAGR of 32.4% over the forecast period.
- Moreover, the small and mid-sized companies segment is expected to exhibit the highest CAGR over the forecast period. In 2017, the small and mid-sized companies segment generated revenue of US$ 0.55 Bn and is expected to reach US$ 10.26 Bn by 2026 with a CAGR of 38.4% over the forecast period.

Source: Coherent Market Insights, 2017-18

© Coherent Market Insights. All Rights Reserved

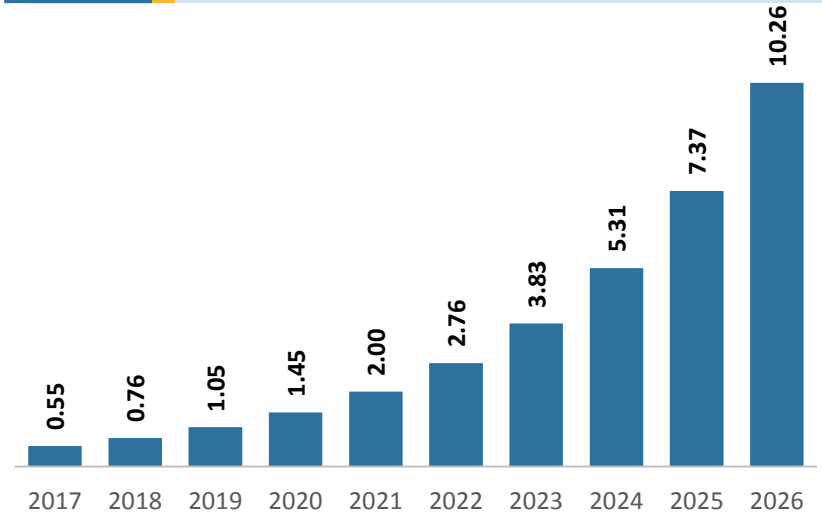
SECTION 6.1

GLOBAL AIOps PLATFORM MARKET, BY SMALL AND MID-SIZED COMPANIES

- Segmental Analysis

SMALL AND MID-SIZED COMPANIES SEGMENT GENERATED REVENUE OF US$ 0.55 BILLION IN 2017

FIGURE 6.1.1 Global AIOps Platform Market Value (US$ Bn) Analysis and Forecast, by Small and Mid-sized Companies



38.4% projected growth rate of small and mid-sized companies segment between 2018 and 2026

- In 2017, the small and mid-sized companies segment generated the revenue of US$ 0.55 Bn and is expected to reach US$ 10.26 Bn by 2026, with a CAGR of 38.4% over the forecast period.
- The demand for AIOps platform solution by small and mid-sized companies is increasing, owing to rise in adoption of cloud computing technology and advance technologies such as machine learning, analytics, and others. For instance, in August 2018, Moogsoft announced the launch of Moogsoft Observe to extend the Moogsoft's core AIOps platform capabilities from centralized analytics outwards to the data source, providing the IT teams with absolute visibility and total observability of customer impacting problems wherever they occurred.
- The ability of AIOps platform to analyze vast volumes of data through application of various algorithms in real time is propelling demand for AIOps platform. Implementation of new technology, like in-memory analytics and stream mining in-database analytics provides real time analysis for situational intelligence, fraud detection, and customer interactions.

Source: Coherent Market Insights, 2017-18

© Coherent Market Insights. All Rights Reserved

SMALL AND MID-SIZED COMPANIES SEGMENT FORECAST

- With the assistance of AI-powered applications and services, small and mid-sized companies can operate similar to a fully-staffed global enterprise company, with the added benefit of more speed and efficiency. As innovations in AIOps platform are introduced in to the market, small and mid-sized companies find new and better ways to work more accurately without investing more on man power required for various processes and making a better use of internal staff resources.
- Moreover, Prolitus, one of the mid-sized machine learning companies in India, provide artificial intelligence solutions to help organization automate processes and leverage from machine learning tools. Hence, the small and mid-sized companies segment is expected to adopt AIOps platform solutions at a higher rate as compared to large enterprises.

Source: Coherent Market Insights, 2017-18

© Coherent Market Insights. All Rights Reserved

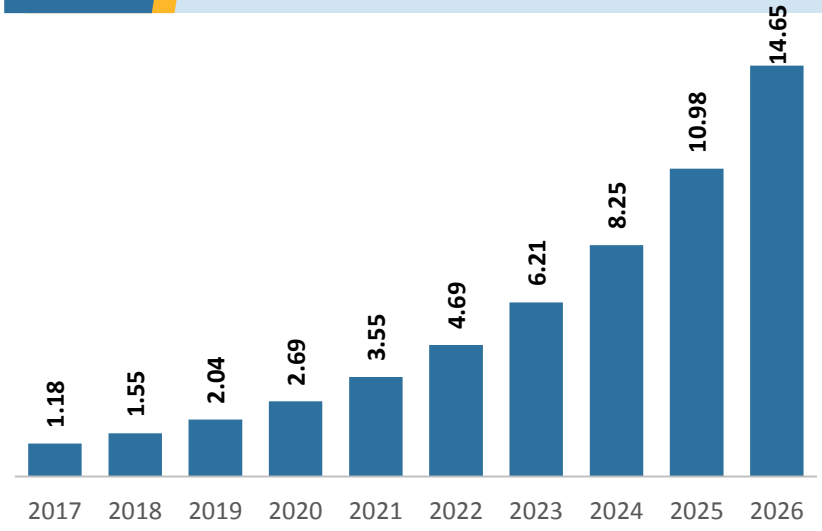
SECTION 6.2

GLOBAL AIOps PLATFORM MARKET, BY LARGE ENTERPRISES

- Segmental Analysis

LARGE SEGMENT GENERATED REVENUE OF US$ 1.18 BILLION IN 2017

FIGURE 6.2.1 Global AIOps Platform Market Value (US$ Bn) Analysis and Forecast, by Large Enterprises



32.4% projected growth rate of large enterprises segment between 2018 and 2026

- In 2017, the large enterprises segment generated the revenue of US$ 1.18 Bn and is expected to reach US$ 14.65 Bn by 2026, with a CAGR of 32.4% over the forecast period.
- The AIOps platform market is gaining significant traction among the various large enterprises. This aids in procuring real-time data by eliminating silos, better tracking and management, automated problem solving, and digital conversion. With advancements in technology, generation of voluminous data, customer demands, and process inefficiencies, AIOps platform provide better solutions to large organizations.
- Increasing adoption of machine learning and data analysis to make sense out of existing internal management systems are further fueling the adoption of AIOps platform among the large industries. AIOps platform describes the paradigm shift that will enable the businesses to cope up with accelerating digital business transformation.
- AIOps platform employs the automation, big data analytics, and machine learning to streamline and enhance IT operations with proactive, personal and dynamic insight. For instance, in October 2018, FixStream Company announced the expanded support of its AIOps Platform with Oracle applications.

Source: Coherent Market Insights, 2017-18

© Coherent Market Insights. All Rights Reserved

LARGE ENTERPRISES SEGMENT FORECAST

- With FixStream Company, other organizations can quickly detect and predict application issues in real time using advanced end-to-end correlation and visualization using its artificial intelligence and machine learning solution as well as provide a business-centric view of hybrid IT environments to proactively manage, plan, and troubleshoot revenue-impacting business-critical processes in real-time.
- Large enterprises are launching more applications designed to increase engagement with digital consumers at every touch point in the customer experience life cycle. For instance, in October 2018, CA launched new AIOps platform, which enables IT teams to automate and eliminate key tasks and make self-healing applications a reality. This AIOps-driven platform aims to correlate and analyze the IT operational data and digital delivery chains, leveraging new innovation in AI, machine learning, and automation capabilities.

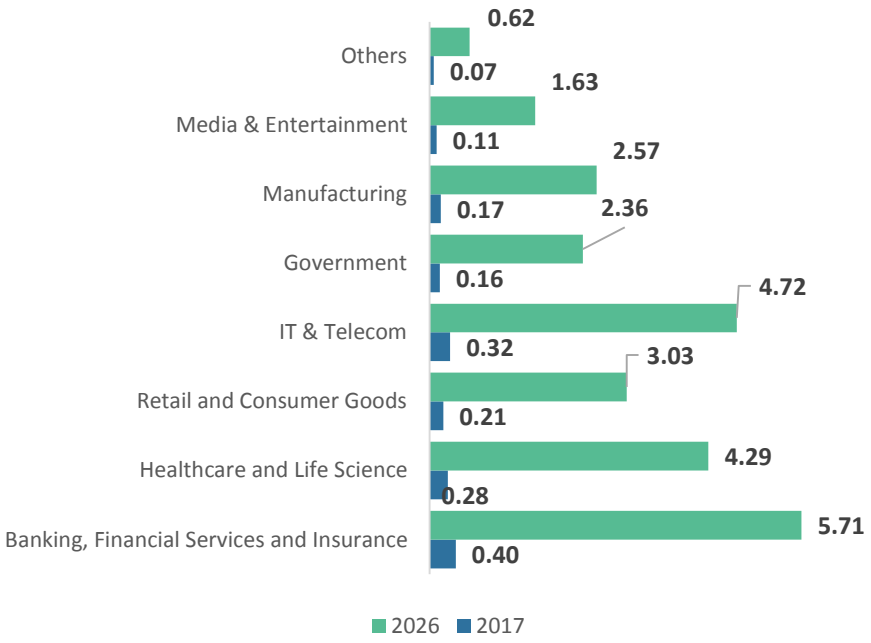
SECTION 7

GLOBAL AIOps PLATFORM MARKET, BY VERTICALS

- Segment Analysis

THE HEALTHCARE AND LIFE SCIENCES SEGMENT IS EXPECTED TO EXHIBIT HIGH GROWTH OVER THE FORECAST PERIOD

FIGURE 7.1 Global AIOps Platform Market Value (US$ Bn) Comparison, by, 2017 & 2026



- Among vertical, the global AIOps platform market is segmented into banking, financial services and insurance, healthcare and life sciences, retail and consumer goods, IT and telecom, government, manufacturing, media & entertainment, and others

- In 2017, banking, financial services, and insurance segment held the dominant position in the market and is expected to retain its dominance throughout the forecast period. In 2017, the banking, financial services, and insurance segment generated revenue of US$ 0.40 Bn and is expected to reach US$ 5.71 Bn by 2026 with a CAGR of 34.3% over the forecast period.

- Moreover, the healthcare and life sciences segment is expected to exhibit the highest CAGR over the forecast period. In 2017, the segment generated revenue of US$ 0.28 Bn and is expected to reach US$ 4.29 Bn by 2026 with a CAGR of 35.4% over the forecast period.

Source: Secondary and Primary Research, Coherent Market Insights, 2017-18

© Coherent Market Insights. All Rights Reserved

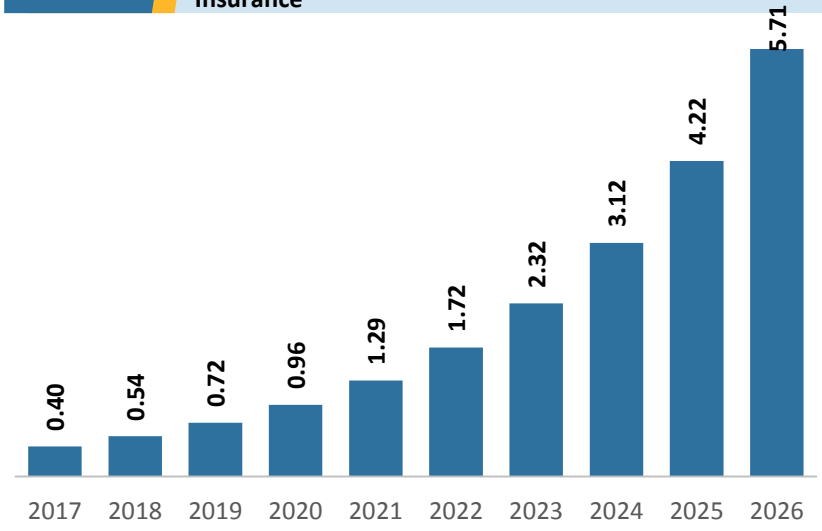
SECTION 7.1

GLOBAL AIOps PLATFORM MARKET, BY BANKING, FINANCIAL SERVICES AND INSURANCE

- Segmental Analysis

BANKING, FINANCIAL SERVICES AND INSURANCE SEGMENT GENERATED REVENUE OF US$ 0.40 Bn IN 2017

FIGURE 7.1.1 Global AIOps Platform Market Value (US$ Bn) Analysis and Forecast, by Banking, Financial Services and Insurance



34.3% Projected growth rate of banking, financial services and insurance segment between 2018 and 2026

- In 2017, the banking, financial services and insurance segment generated revenue of US$ 0.40 Bn and is expected to reach US$ 5.71 Bn by 2026 with a CAGR of 34.3% over the forecast period
- Increasing adoption of AI technology for safe and smart online banking transactions, customer retention, and product and services demand analysis have accelerated growth of the segment in the market
- In BFSI industry, most of the analytic tools are used to track each customers' records, including transactions analysis, investment profiles, customer complaints, individual customer profiles, insurance product analysis, and customer loyalty among others. These are the factors that help to improve customer relation management by providing the exact need to the customer by analyzing their profile. Furthermore, AI analytic tools and techniques aid in predicting futuristic demand that helps to increase the capability to identify customer habits, preferences, and behaviors. It also allows banking organizations to modify their products and services, in order to meet customer needs, solve their problems, and promote customer maintenance and reliability, which in turn helps them to develop new strategies for the business.

Source: Secondary and Primary Research, Coherent Market Insights, 2017-18

© Coherent Market Insights. All Rights Reserved

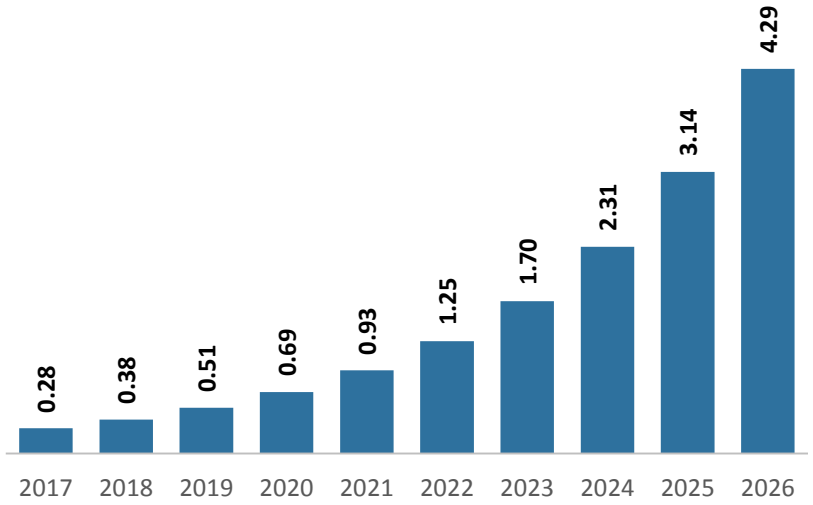
SECTION 7.2

GLOBAL AIOps PLATFORM MARKET, BY HEALTHCARE AND LIFE SCIENCE

- Segmental Analysis

HEALTHCARE AND LIFE SCIENCE SEGMENT GENERATED REVENUE OF US$ 0.28 Bn IN 2017

FIGURE 7.2.1 Global AIOps Platform Market Value (US$ Bn) Analysis and Forecast, by Healthcare



35.4% Projected growth rate of healthcare and life science segment between 2018 and 2026

- In 2017, the healthcare and life science segment generated revenue of US$ 0.28 Bn and is expected to reach US$ 4.29 Bn by 2026 with a CAGR of 35.4% over the forecast period
- Increasing adoption of artificial intelligence in healthcare industry for the development of advanced medical devices is accelerating growth of this segment. The adoption of AI in healthcare sector enable machines to sense and comprehend data for clinical practices and health service organizations. Moreover, the adoption of AI to analyze unstructured data such as photos, videos, and physician notes to enhance clinical decision making and adoption of AI interfaces to improve patient engagement and compliance with treatment is increasing demand for AI-based solutions, thereby driving growth of this segment in the AIOps platform market.
- Furthermore, AI applications in robot-assisted, virtual nursing assistants surgery, dosage error reduction, clinical trial participant identifier, preliminary diagnosis, and automated image diagnosis in healthcare sector is fueling growth of this segment in the global AIOps platform market

Source: Secondary and Primary Research, Coherent Market Insights, 2017-18

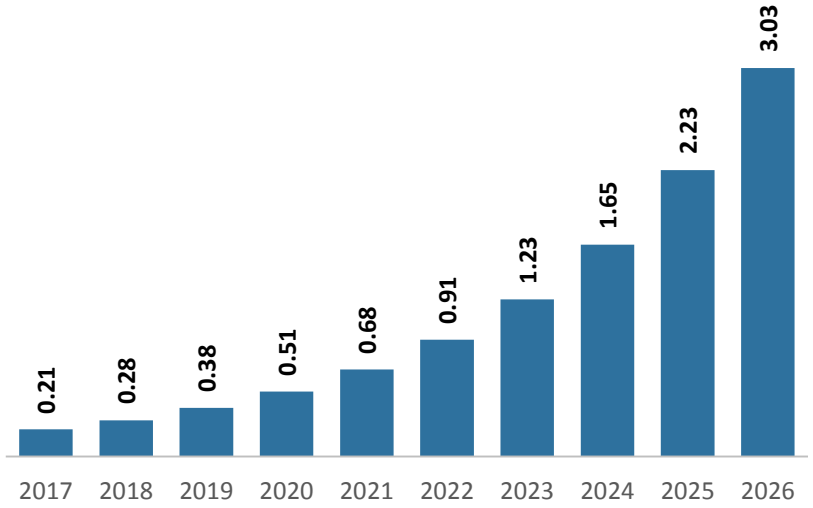
SECTION 7.3

GLOBAL AIOps PLATFORM MARKET, BY RETAIL & CONSUMER GOODS

- Segmental Analysis

RETAIL & CONSUMER GOODS SEGMENT GENERATED REVENUE OF US$ 0.21 Bn IN 2017

FIGURE 7.3.1 Global AIOps Platform Market Value (US$ Bn) Analysis and Forecast, by Retail & Consumer Goods



34.4% Projected growth rate of retail & consumer goods segment between 2018 and 2026

- In 2017, the retail & consumer goods segment generated revenue of US$ 0.21 Bn and is expected to reach US$ 3.03 Bn by 2026 with a CAGR of 34.4% over the forecast period. The integration of artificial intelligence in retail industry plays a major role in the growth of the companies sales. The adoption of artificial intelligence by retailers to communicate with customers through personalized online experiences, conversational robots and chatbots, and voice shopping helps companies to analyze the market or customer demand.
- Moreover, increasing demand for real-time data analytics from various retail organizations is one of the major factors for increasing adoption of AI technology. This is owing to its advantages such as fast and accurate results and cost-effectiveness. Understanding the market trends and customer demand through real-time data analytics helps companies offer their products to customers before their competitor's launch similar products. For instance, Celect, a U.S.-based company, provides an Inventory Optimization Suite that uses machine learning and predictive analytics to improve retail inventories by providing insights related to future buying patterns and behavior. Therefore, increasing adoption of AI-based solutions have accelerated growth of the segment in the global market.

Source: Secondary and Primary Research, Coherent Market Insights, 2017-18

© Coherent Market Insights. All Rights Reserved

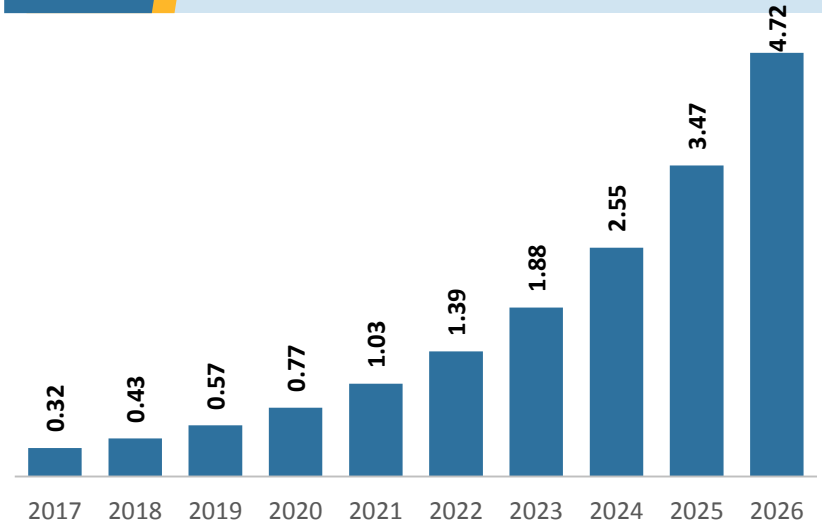
SECTION 7.4

GLOBAL AIOps PLATFORM MARKET, BY IT & TELECOM

- Segmental Analysis

IT & TELECOM SEGMENT GENERATED REVENUE OF US$ 0.32 Bn IN 2017

FIGURE 7.4.1 Global AIOps Platform Market Value (US$ Bn) Analysis and Forecast, by IT & Telecom



35.1% Projected growth rate of IT & telecom segment between 2018 and 2026

- In 2017, the IT & telecom segment generated revenue of US$ 0.32 Bn and is expected to reach US$ 4.72 Bn by 2026 with a CAGR of 35.1% over the forecast period
- Increasing adoption of artificial intelligence by various telecom companies to provide better network is one of the major factors driving growth of this segment in the market. As telecom companies are adopting various technologies such as virtualization, SDN-NFV, and orchestration for advanced network, AI provides the platform for smooth integration of these technologies and automating the network. The emerging technologies such as IoT and Cloud are aiding telecom companies in handling high volume of data, which is important for automation. This could help telecom companies in better planning and connectivity.
- According to Coherent Market Insights' analysis, in 2017, it was estimated that 63.5% of the telecommunication organizations invested for making new technology for AI system, globally
- Hence, adoption of new technology for advanced network generation and investment by telecom companies for AI is driving growth of this segment in the global market

Source: Secondary and Primary Research, Coherent Market Insights, 2017-18

© Coherent Market Insights. All Rights Reserved

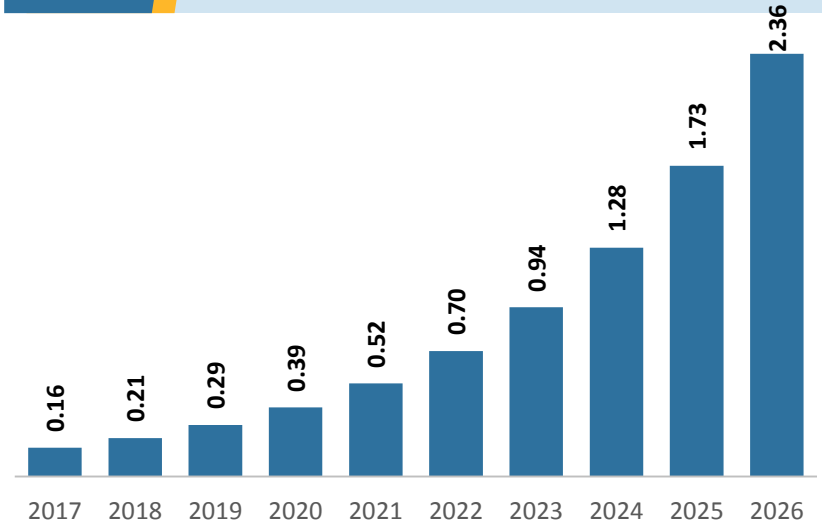
SECTION 7.5

GLOBAL AIOps PLATFORM MARKET, BY GOVERNMENT

- Segmental Analysis

GOVERNMENT SEGMENT GENERATED REVENUE OF US$ 0.16 Bn IN 2017

FIGURE 7.5.1 Global AIOps Platform Market Value (US$ Bn) Analysis and Forecast, by Government



34.9% Projected growth rate of government segment between 2018 and 2026

- In 2017, the government segment generated revenue of US$ 0.16 Bn and is expected to reach US$ 2.36 Bn by 2026 with a CAGR of 34.9% over the forecast period
- Rising demand of public sector or government to improve services is one of the major factors driving growth of the segment in the market. For instance, in 2015, the Department of Homeland Security's Citizenship and Immigration and Services developed a virtual assistant, EMMA, which responds accurately to human language. With the usage of AI, EMMA answers almost a half-million questions per month. Through the process of supervised learning, EMMA gets smarter by analyzing the data or customer feedback.
- Moreover, the adoption of cognitive automation and robotics by government helps in solving challenges of resource constraints, paperwork burdens, and backlogs. This can be done by integrating automatic handwriting recognition, handle scheduling with planning and optimization algorithms, and use speech recognition, natural language processing, and question answering technology to provide customer service.

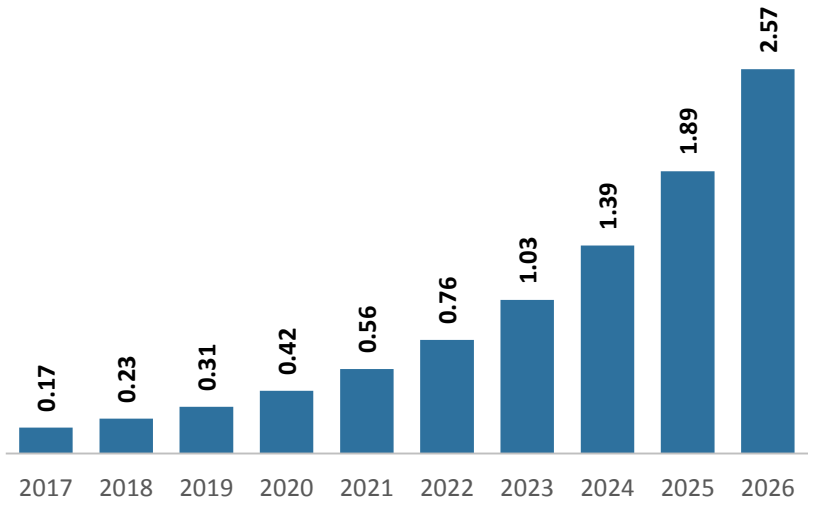
SECTION 7.6

GLOBAL AIOps PLATFORM MARKET, BY MANUFACTURING

- Segmental Analysis

MANUFACTURING SEGMENT GENERATED REVENUE OF US$ 0.17 Bn IN 2017

FIGURE 7.6.1 **Global AIOps Platform Market Value (US$ Bn) Analysis and Forecast, by Manufacturing**



35.0% Projected growth rate of manufacturing segment between 2018 and 2026

- In 2017, the manufacturing segment generated revenue of US$ 0.17 Bn and is expected to reach US$ 2.57 Bn by 2026 with a CAGR of 35.0% over the forecast period
- Rising adoption of AI-based applications in manufacturing industry for various process is a key factor driving growth of the segment in the market. From significant cuts in unplanned downtime to better designed products, manufacturers are integrating AI-powered analytics solution to data to improve efficiency, product quality, and the safety of employees.
- The integration of predictive analytics solution for the prediction of failure of parts, machine or system helps to reduce the downtime of the production line. The predictive maintenance uses advanced AI algorithm in the form of artificial neural network and machine learning to generate predictions regarding asset malfunction, which helps companies to reduce the cost of unplanned downtime.
- Moreover, rising adoption of quality 4.0 in manufacturing industry have accelerated growth of the segment in the market. The usage of AI algorithm quality 4.0 helps the manufacturing team to reduce faults in products.

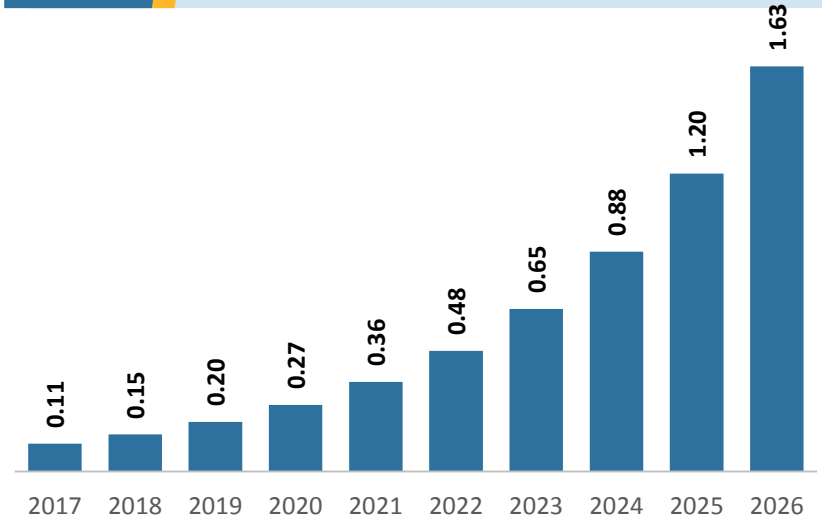
SECTION 7.7

GLOBAL AIOps PLATFORM MARKET, BY MEDIA & ENTERTAINMENT

- Segmental Analysis

MEDIA & ENTERTAINMENT SEGMENT GENERATED REVENUE OF US$ 0.11 Bn IN 2017

FIGURE 7.7.1 Global AIOps Platform Market Value (US$ Bn) Analysis and Forecast, by Media & Entertainment



34.8% Projected growth rate of media & entertainment segment between 2018 and 2026

- In 2017, the media & entertainment segment generated revenue of US$ 0.11 Bn and is expected to reach US$ 1.63 Bn by 2026 with a CAGR of 34.8% over the forecast period
- Increasing adoption of AI solutions in media and entertainment industry for various applications such as marketing and advertising have accelerated growth of the segment in the market. AI-based analytical solutions helps to analyze customer related data and helps media companies to better understand customers' preference and demand, and deliver personalized content, which includes movies, music, videos, and games for various groups of audiences.
- In media and entertainment industry, companies need to be updated about the content consumers are more interested in. AI solutions automates the process and helps to overcome content creation issue and creates opportunities by mapping business model, content planning, and media advertising.

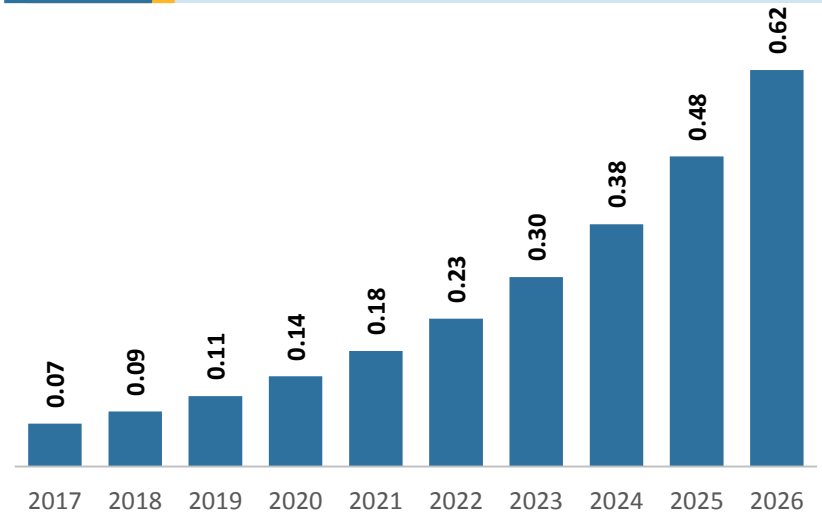
SECTION 7.8

GLOBAL AIOps PLATFORM MARKET, BY OTHERS

- Segmental Analysis

OTHERS SEGMENT GENERATED REVENUE OF US$ 0.07 Bn IN 2017

FIGURE 7.8.1 **Global AIOps Platform Market Value (US$ Bn) Analysis and Forecast, by Others**



28.0% Projected growth rate of others segment between 2018 and 2026

- In 2017, the others segment generated revenue of US$ 0.07 Bn and is expected to reach US$ 0.62 Bn by 2026 with a CAGR of 28.0% over the forecast period.
- The others segment comprises of different end use verticals such as aerospace & defense, education, and automotive.
- The others segment created absolute dollar opportunity of US$ 0.55 Bn for AIOps platform providers in the market place across the globe.

SECTION 8

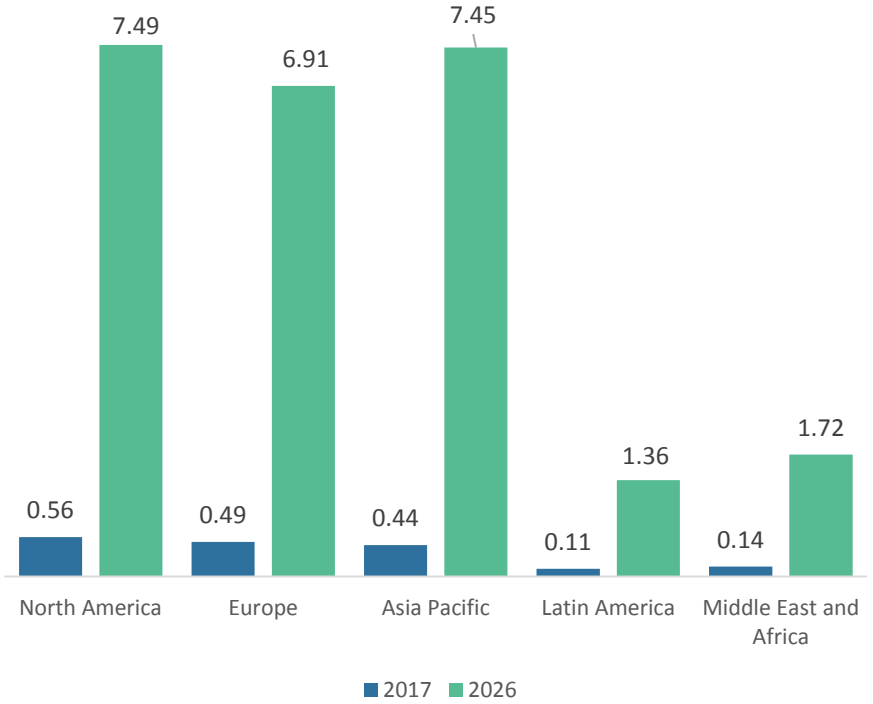
GLOBAL AIOps PLATFORM MARKET, BY REGION

- Regional Analysis

REGIONAL MARKET OVERVIEW (US$ BN)

NORTH AMERICA ACCOUNTED FOR THE LARGEST SHARE IN THE GLOBAL MARKET IN 2017

FIGURE 8.1 Global AIOps platform Market Value (US$ Bn) Comparison, by Region, 2017 & 2026



- On the basis of geography, the Artificial Intelligence for IT operation (AIOps) platform market is segmented into North America, Europe, Asia Pacific, Latin America, Middle East, and Africa.
- Growing demand for AI-based services in IT operations, increasing shift of IT organizations core business towards the cloud, and increasing end-to-end business application assurance and uptime are the major factors driving growth for the AIOps platform market. Moreover, increasing complexities of IT infrastructure and software environments has boosted adoption of AIOps platforms across various industries as these platforms offer closed-loop remediation for problems through automation and without human interference. This feature of AIOps platform not only offers an improved efficiency but also saves times & process related costs.
- North America AIOps platform market held a dominant position in 2017, and is expected to retain its dominance throughout the forecast period. In 2017, the North America market generated revenue of US$ 0.56 Bn. By 2026, the market in North America is projected to reach US$ 7.49 Bn, exhibiting a CAGR of 33.6% over the forecast period.

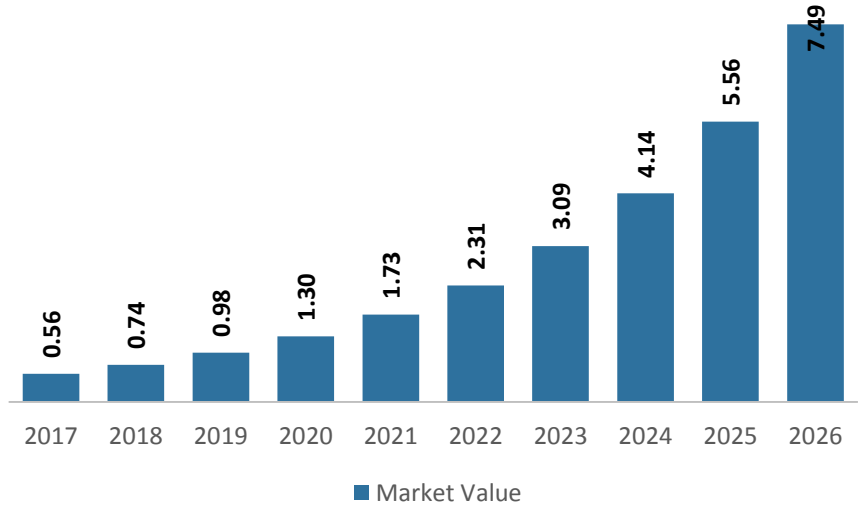
SECTION 8.1

NORTH AMERICA AIOps PLATFORM MARKET

- Country and Segment Analysis

NORTH AMERICA AIOps PLATFORM MARKET GENERATED REVENUE OF US$ 0.56 BN IN 2017

FIGURE 8.1.1 North America AIOps platform Market Value (US$ Bn) Analysis and Forecast



33.6% Projected growth rate of North America AIOps platform market between 2018 and 2026

- In 2017, North America AIOps platform market generated revenue of US$ 0.56 Bn and is expected to reach US$ 7.49 Bn by 2026, witnessing a CAGR of 33.6% over the forecast period
- In the U.S., organizations in IT sectors such as Fixstream, Splunk have installed AIOps platform solutions to enhance its IT operation workflow without the need of user intervention and decisions. North America is expected to be the largest market, in terms of size during the forecast period, owing to high presence of key players coupled with number developed economies, empowering them to invest in research and development activities heavily.
- North America is driving growth of the AIOps Platform market, owing high presence of early adopters of advanced technologies such as Machine Learning, Artificial Intelligence, Big Data, and Analytics in the region. The region also have high presence of several key companies such as Salesforce, Fixstream, and Microsoft, who are engaged in AI in IT operations platform.

Source: Secondary and Primary Research, Coherent Market Insights, 2017-18

© Coherent Market Insights. All Rights Reserved

- The presence of IT companies such as Microsoft Corporation, IBM, Oracle, and others plays a major role for growth of the market in the region. Furthermore, these tech companies are focusing on delivering AIOps platform powered services to meet the demands of AI-powered solutions and help its customers in building intelligent applications in this market. For instance, in October 2017, BMC Software announced partnership plans with IBM to integrate machine learning, predictive capabilities, and AI from IBM Watson into BMC's leading IT service management solutions.

- The Government of the U.S. is taking initiatives to enhance the existing infrastructure, which is expected to drive demand for AIOps platforms across the region, during the forecast period. For instance, in December 2016, the report ‘Artificial Intelligence, Automation, and the Economy,’ published by the U.S. government, describes various developments, such as long-term investments in AI, focused approach towards analyzing as well as solving social implications of AI, and security and safety of AI systems, to boost the adoption of AI-powered solutions across the country. Moreover, these initiatives help in launching programs, such as National Artificial Intelligence Research and Development and smart city programs, which enhances development of the existing IT infrastructure.

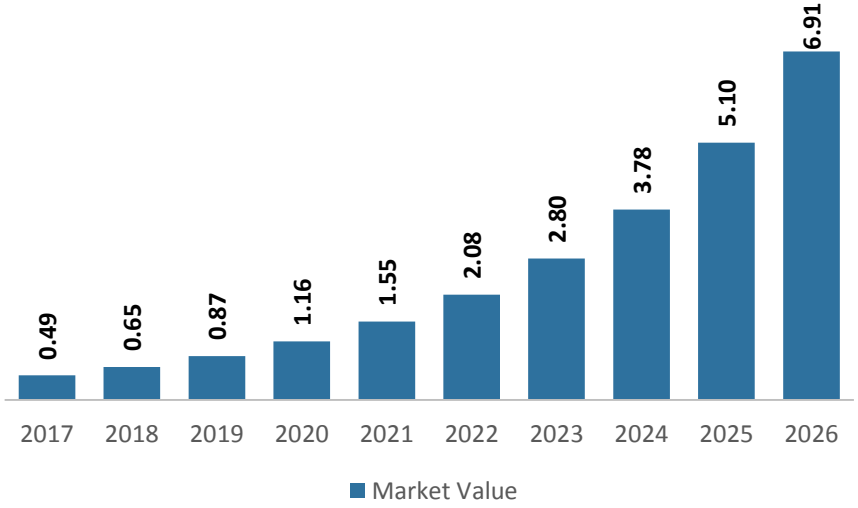
SECTION 8.2

EUROPE AIOps PLATFORM MARKET

- Country and Segment Analysis

EUROPE AIOps PLATFORM MARKET GENERATED REVENUE OF US$ 0.49 BN IN 2017

FIGURE 8.2.1 Europe AIOps platform Market Value (US$ Bn) Analysis and Forecast



34.4% Projected growth rate of Europe AIOps platform market between 2018 and 2026

- In 2017, Europe AIOps platform market generated revenue of US$ 0.49 Bn and is expected to reach US$ 6.91 Bn by 2026, witnessing a CAGR of 34.4% over the forecast period
- Europe is home to world-class researchers, labs, and start-ups, and has a strong industrial base that serves as the basis for adoption of AIOps platforms. For instance, in March 2018, the government of France announced plans to invest about US$ 1.7 billion in AI research in the near future.
- Key companies such as Facebook, Samsung, IBM, DeepMind, and Fujitsu have set up its AI labs and research centers in Paris, which aims to create an optimistic solution of turning Europe into an AI hub. Moreover, in November 2018, the Government of France has announced plans to open French DARPA based institute to develop the field of AI platform for its defense sector.
- Increasing demand for software systems that utilize artificial intelligence for IT operations platform, cognitive computing algorithms, and techniques to enhance IT operations are driving growth of the AIOps platform market in this region.

Source: Secondary and Primary Research, Coherent Market Insights, 2017-18

© Coherent Market Insights. All Rights Reserved

- Governments in Europe seem to take a supportive role with artificial intelligence technology related policies that encourage research and industry to enhance and manage its workflow in IT operations. For instance, in April 2018, the European Commission (EC) announced a three pronged approach with respect to artificial intelligence technology such as increase public and private investment in artificial intelligence systems, prepare for socio-economic changes, and ensure an appropriate ethical and legal framework.

- Moreover, United Kingdom focuses on facilitating and investing in AI-powered technologies with high number of players involving in partnership activities with its academic, technical, and finance ecosystems. For instance, in the healthcare sector, partnerships have been formed between the National Health Service (NHS) and AI developers such as IBM, DeepMind, and Babylon Health. An openness to sharing data between the private sector as well as focus on attracting global talent makes Europe one of the most competitive regions for AIOps platform.

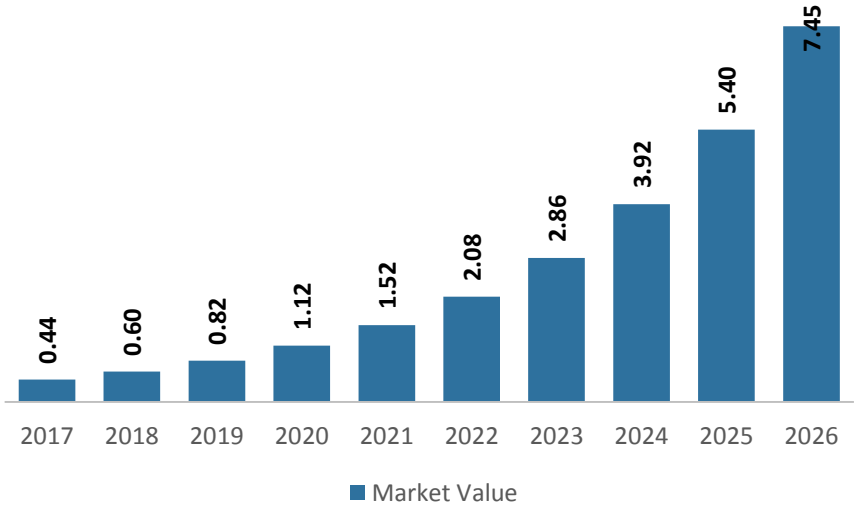
SECTION 8.3

ASIA PACIFIC AIOps PLATFORM MARKET

- Country and Segment Analysis

ASIA PACIFIC AIOps PLATFORM MARKET GENERATED REVENUE OF US$ 0.44 BN IN 2017

FIGURE 8.3.1 Asia Pacific AIOps platform Market Value (US$ Bn) Analysis and Forecast



37.0% Projected growth rate of Asia Pacific AIOps platform market between 2018 and 2026

- Asia Pacific AIOps platform market generated revenue of US$ 0.44 Bn in 2017, and is expected to reach US$ 7.45 Bn by 2026, witnessing a CAGR of 37.0% over the forecast period
- The investments in data infrastructure, research hubs and networks, and higher education for IT and data-related fields plays an important role in laying the foundation for AI platform in Asia Pacific. The demand for AI-powered solutions and services are growing across Asia Pacific, owing to rapid generation of large volumes of data. Small and mid-sized organizations can improve its business functions and profitability by using AI-powered products by leveraging AI technology. For instance, Clare.AI, a software company in Hong Kong, offers a mobile application that small and mid-sized organizations can use for their online banking services. Clare.AI uses machine learning algorithms and natural language processing to handle large number of customer inquiries without any humans efforts.

Source: Secondary and Primary Research, Coherent Market Insights, 2017-18

© Coherent Market Insights. All Rights Reserved

- AI-powered solutions and services, such as machine learning, drives innovations in the realm of data analytics and address the gaps related to previously used tools. For instance, in June 2018, Tencent developed AI-aided medical platform Miying, a medical imaging program that detects the early signs of cancer. This platform is used in over 100 hospitals across China, improving the accuracy of diagnoses and quality of healthcare outcomes for patients.

- According to Coherent Market Insights, the oil and gas industry in China is also focusing on increasing adoption of AIOps platform, as China is the fourth-largest oil producer in the world and has one of the world's largest oil reserves. For instance, China Petroleum and Chemical Corporation (Sinopec) announced its plans to leverage AI-powered technology, including 10 ‘intelligent plants’, which will eventually reduce the operating costs within its long-term corporate plans. Sinopec Group is a state-owned oil company, (largest in China and second-largest oil company in the world). Furthermore, demand for AIOps-powered solutions and services is growing in China, due to rapid generation of large volumes of data and increasing use of digital technologies, IoT, and connected devices in large enterprises.

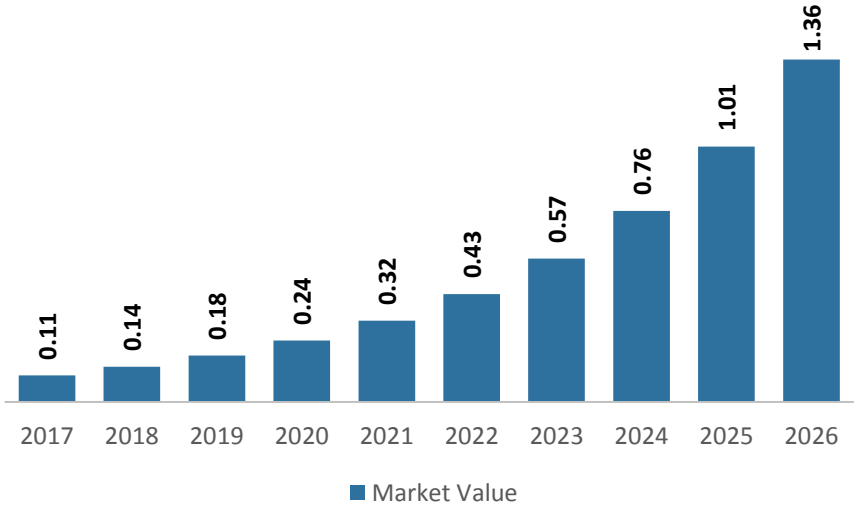
SECTION 8.4

LATIN AMERICA AIOps PLATFORM MARKET

- Country and Segment Analysis

LATIN AMERICA AIOps PLATFORM MARKET GENERATED REVENUE OF US$ 0.11 BN IN 2017

FIGURE 8.4.1 Latin America AIOps platform Market Value (US$ Bn) Analysis and Forecast



32.9% Projected growth rate of Latin America AIOps platform market between 2018 and 2026

- Latin America AIOps platform market generated revenue of US$ 0.11 Bn in 2017, and is expected to reach US$ 1.36 Bn by 2026, witnessing a CAGR of 32.9% over the forecast period
- Companies in Latin America are adopting artificial intelligence enterprises by using digital technology to improve business processes. Key companies are applying big data analytics to find new sources of growth and installing intelligent machines to complete routine work in less time.
- Conventionally strong commodity-based industries in South America focuses on various business strategies to increase its productivity by adopting AI based technologies. For instance, in September 2012, Codelco, mining company in Chile and world's largest copper producer, signed an agreement with DIAGNOS, AI software developer and service provider, to pioneer the adoption of autonomous trucks. DIAGNOS will assist Codelco in identifying the targets by using its Computer Aided Resource Detection System (CARDS) technology, which makes possible the identification of mining sites.

- In Mexico, the public and private industries leverages AIOps powered applications to enhance services and make them more responsive. For instance, in April 2017, Laboratorio para la Ciudad (LabCDMX) and SM1 collaborated with Datank.ai, to use data from GPS in SM1 buses to create efficient system for bus departures and optimize the transportation flows.

- Using AIOps platform, intelligent remediation delivers better user experience and reduces time, without requiring IT teams to rely on AIOps bots. For instance, in May 2018, Urbem Digital, developed by Civica Digital, uses an AIOps-enabled chatbots in Facebook Messenger to answer the citizens request for information, provide documents, and gather feedbacks. In addition to this, municipalities of San Pedro Garza Garcia, Sonora, Nuevo Leon, and Hermosillo adopted Urbem digital platform to provide a single portal for citizens access to the information about status of local utilities.

- AIOps platform can enhance revenue of various industries, which are burdened with high costs of manufacturing machinery. For instance, in March 2017, Ubivis, a start-up company in Brazil, installed sensors and external drivers in industrial machines that generate large quantities of data. This data feeds machine-learning processes that are able to predict problems before they arise, thus minimizing time as well as cost, all without human supervision.

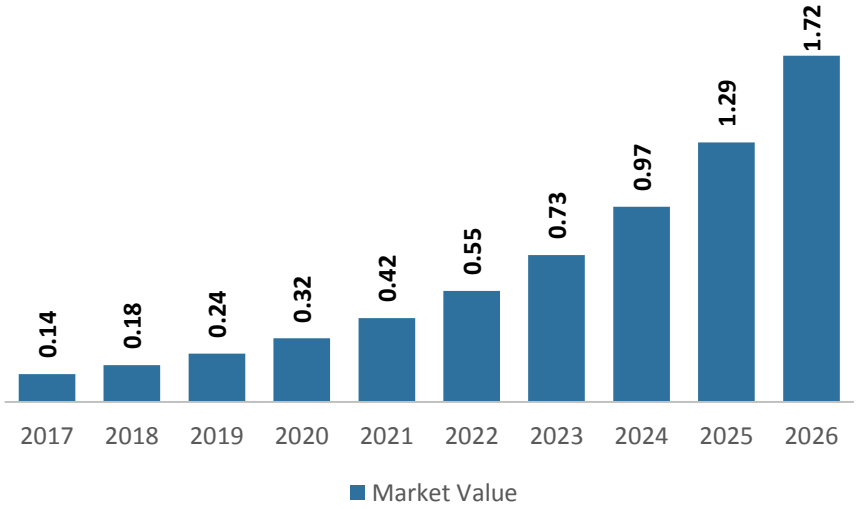
SECTION 8.5

MIDDLE EAST AND AFRICA AIOps PLATFORM MARKET

- Country and Segment Analysis

MIDDLE EAST AND AFRICA AIOps PLATFORM MARKET GENERATED REVENUE OF US$ 0.14 BN IN 2017

FIGURE 8.5.1 Middle East And Africa AIOps Platform Market Value (US$ Bn) Analysis and Forecast



32.4% Projected growth rate of Middle East and Africa market between 2018 and 2026

- Middle East and Africa AIOps platform market generated revenue of US$ 0.14 Bn in 2017, and is expected to reach US$ 1.72 Bn by 2026, witnessing a CAGR of 32.4% over the forecast period

- Various industries in Middle East are adopting AIOps platform, which can be directly attributed to rising investments coupled with growing demand for AI-based services for IT operations, increasing shift of core business to cloud, and rising urbanization. In addition to this, demand for AIOps platform in Africa is expected to show significant growth over the forecast period, owing to rising adoption of AI-powered technologies to enhance the productivity growth by expanding opportunities in key sectors including agriculture, healthcare, financial services, and government services.

MIDDLE EAST AND AFRICA MARKET FORECAST

- Various companies in Middle East are focusing in adopting technological innovations for increasing its productivity and revenue. For instance, FuGenX, one of the technology services company in UAE, builds AIOps powered solutions to provide technological services to assemble adaptable and cost-effective digital products and solutions with minimized labor and infrastructure cost. Moreover, the workers, entrepreneurs, and business magnates are being empowered with the introduction of AI based high quality digital tools, at a global level, which will eventually pave an economic transformation in Africa. For instance, IBM Research Africa (IBM-RA) in Kenya and South Africa is the first commercial technology research facility in Africa, which conducts both applied and far-reaching exploratory research. Such developments will help in developing innovative and commercially-viable solutions in healthcare, financial services, education, energy, security, agriculture, and transportation sectors.
- Furthermore, the UAE government is investing in education and skill development to allow people to adopt AI technology. For instance, in October 2018, Bee'ah and Evoteq announced plans to launch UAE's first advanced Artificial Intelligence platform, which will digitally transform operations to maximize productivity, business excellence, and sustainable practices. This revolutionary platform will facilitate UAE's transition from e-governments to AI-powered government systems.
- Moreover, in June 2018, Google announced its plan for opening Google AI Research Lab Centre in Ghana, Africa. This center is dedicated to AI research and its applications, which allows to gather and analyze vast data sets, as well as extract insights to improve decision making in areas such as healthcare, agriculture, and education. This will aid in collaborating local universities and research centers with policy makers on potential uses of AI technology in Africa.
- In Middle East region, Dubai is also significantly adopting AI-powered technology. For instance, in 2017, the government also launched an AIsmart lab to focus on private sector and training public employees in implementing AIOps platform in their fields. In addition, the Emirates has also implemented the Smart Dubai strategy, which aims to transform the city through digital transformation and innovation. Similarly, the factors like improved power supply, high-speed internet, more early-stage investment funding, and increase in smartphone use have created a fertile environment for Africa's emerging AIOps platform industry.

COMPANY DETAILS

COMPANY NAME	International Business Machines Corporation (IBM)
ESTABLISHED	1911
HEADQUARTERED	New York, U.S.
KEY MANAGEMENT (CEO)	Mrs. Virginia M. Rometty
KEY GEOGRAPHIC OPERATIONS	America, Europe, Middle East, Africa, and Asia Pacific
EMPLOYEE STRENGTH (2017)	3,66,600

COMPANY OVERVIEW

- International Business Machines Corporation (IBM) offers Information Technology (IT) products and services, manufactures and sells computer hardware and software, and offers infrastructure, hosting, and consulting services. The company also offers IT infrastructure and business process services, consulting and system integration, computing power and storage solutions, and application management services.
- IBM offers lease and loan financing to end users. The company offers services to various industries such as industrial, public, financial services, communication, distribution, and general business

KEY DEVELOPMENTS

2018 In March, IBM announced launch of Watson Assistant, a smart enterprise assistant with AI, cloud, and the Internet of Things (IoT). It can be accessed via voice or text interaction. It help businesses to enhance their brand loyalty and transform customer experiences even while keeping the data private and secure.

2018 In October, IBM introduced AI OpenScale, a new technology platform that addresses key challenges of AI adoption such as concerns over how AI applications make decisions, the global shortage of AI skills, and the complexities of working with disparate AI tools from multiple vendors.

2017 In November, IBM announced new offerings to Watson Data Platform including data cataloging and data refining, which is designed to make it easier for developers and data scientists to analyze and prepare enterprise data for AI applications, regardless of its structure or where it resides.

2016 In February, IBM launched an event driven programming service called Bluemix OpenWhisk, which automatically executes user code in response to an external event such as a bit of sensor data arriving.

BUSINESS STRATEGY

PARTNERSHIP AND PRODUCT LAUNCH

- The company is focused on launching new products and adopting partnership strategies in order to enhance its market share
- For instance, in July 2017, IBM announced partnership with Automation Anywhere, one of the prominent players in the robotic process automation. Automation Anywhere offers an advanced platform to integrate people, systems, and bots across the widest assortment of processes.
- In 2016, IBM launched Watson Data Platform that offers user-specific tools, a rich environment that provides collaboration among all roles, rapid ingestion of data of any type, self-service access to trusted data; with governance throughout, automated deployment with cognitive assisted machine learning and Apache Spark, choice of multiple third party technologies within an open ecosystem.

Splunk Inc.

COMPANY DETAILS

COMPANY NAME	Splunk Inc.
ESTABLISHED	2003
HEADQUARTERED	California, U.S.
KEY MANAGEMENT (MARKETING MANAGER)	Mr. Doug Merritt
KEY GEOGRAPHIC OPERATIONS	Europe, Middle East, Africa, and Asia Pacific
EMPLOYEE STRENGTH (2017)	3,200

COMPANY OVERVIEW

- Splunk Inc. is focused on development and marketing of software solutions. The company's offerings enable users to collect, index, search, explore, monitor, and analyze data. Its offerings address diverse data sets that are referred to as big data and are specifically used for machine data.
- The company's products help users in various roles, including information technology (IT), security and business professionals to analyze their machine data and achieve real-time visibility and intelligence about their organization's operations. Moreover, the company offers user behavioral analytics to help detect, respond to, and mitigate advanced, hidden, and insider threats.
- The company offers cloud and online services and education and financial services along with services to government, healthcare/pharmaceuticals, industrials/manufacturing, media/entertainment, retail/ecommerce, technology, and telecommunications industries

Product	Details	North America	Europe	Asia Pacific	Rest of the World
Splunk IT Service Intelligence (ITSI)	Splunk IT Service Intelligence (ITSI) is a monitoring and analytics solution powered by artificial intelligence for IT Operations (AIOps) that offers visibility into health and key performance indicators of critical IT and business services and its infrastructure.

KEY DEVELOPMENTS

2018

In October, Splunk Inc. announced new version of Splunk IT Service Intelligence (ITSI) that can help IT teams to better predict and prevent problems. New version of Splunk ITSI enables unified view of critical IT and business services and enhances automation capacity through AIOps.

2017

In November, the company announced new integrations with Amazon Kinesis Firehose and Amazon GuardDuty. This strategic collaboration with Amazon Web Services (AWS) delivers real-time analytics for customers.

2017

In October, the company acquired SignalSense Inc., a privately held technology company that offers cloud-based advanced data collection and breach detection solutions that leverage machine learning.

Source: Company Website, Primary and Secondary, CMI, 2017-18

BUSINESS STRATEGY

ACQUISITION

- Splunk Inc. is focused on adopting merger and acquisition strategies in order to enhance its market share
- For instance, in April 2018, Splunk Inc. acquired Phantom Cyber, a company that offers security orchestration, automation, and response capabilities that enable security teams to drastically scale their operations efforts. Combining Phantom's Security Orchestration, Automation and Response (SOAR) technology with Splunk's industry-leading big data analytics platform represents a significant advancement for security. IT teams can leverage automation capabilities to help solve automation challenges. It includes Artificial Intelligence for IT Operations (AIOps) and IT customers who are looking to eliminate threats faster and keep their business ahead of the threat landscape.
- In June, 2018, the company announced the acquisition of IT alerting solution, VictorOps for US$ 120 million. Splunk's acquisition of VictorOps suggests that alert management tools as a standalone class cannot really scale without a solid AIOps foundation. The use of Artificial Intelligence can eliminate operations such as incident sorting and root cause analysis and guarantee quicker recovery from incapacitating outages with the proper event analytics.

BUSINESS STRATEGY

PRODUCT LAUNCH

- The company is focused on launching new products to enhance its market share
- For instance, in October 2018, CA Technologies marked a major milestone in the company's autonomous strategy with the availability of CA Digital Experience Insights, which was combined with power of CA Operational Intelligence and CA Automic Service Orchestration. The company formed CA Artificial Intelligence for IT Operations (AIOps) platform to enable IT teams to automate key tasks and make self-healing applications a reality. The CA AIOps-driven platform leverages new, innovative AI, machine learning, and automation capabilities. The platform normalizes, correlates, and analyzes rapidly increasing volume and form of IT operational data across the digital delivery chain. The platform provides end-to-end connections from cloud to mainframe to offer superior user experiences, whereas rushing innovation and increasing IT potency.

BUSINESS STRATEGY

STRATEGIC AGREEMENT

- The company focuses on inorganic growth strategies, in order to enhance its market share. For instance, in August 2018, VMware, Inc. announced signing a definitive agreement to acquire CloudHealth Technologies. CloudHealth Technologies has over 3,000 international customers and delivers cloud operation platform across AWS, Microsoft Azure, and Google Cloud. The platform allows customers to assist, analyze, and manage cloud cost, usage, security, and performance centrally for native public clouds. Under this deal, VMware cloud automation services, VMware Secure State, and Wavefront by VMware can deliver automation and compliance, security and governance, insights and analytics to complement CloudHealth Technologies' capabilities.

KEY DEVELOPMENTS

2018 In February, Micro Focus announced the launch of first containerized micro services platform. This new ITOM platform helps in tackling challenges of hybrid IT.

2018 In April, the company launched secure data sentry - accelerating time to value for protecting data across hybrid IT while simplifying security of cloud workloads, and it reduces the risk of data breach.

2018 In May, the company introduced a platform which transforms IT operations with industry's first containerized ITOM platform. This platform integrates DevOps with AIOps to speed service delivery in the hybrid IT environments.

2018 In July, Micro Focus introduced a new feature in IDOL, which brought AI to Data Discovery. It helps in acquiring data from virtually anywhere and preventing potential data breaches.

2017 In September, Micro Focus accelerated deployment of hybrid cloud workloads with sensitive data. It provided consistent data security and privacy controls for scaled analytics, enterprise data processing, and mission critical transactions.

2017 In September, the company launched upgraded version of Vertica, Vertica 9. It consists of unified advance analytics database features.

2017 In September, Micro Focus completed a US$ 8.8Bn Hewlett Packard Enterprise acquisition deal. The objective of the deal was to enhance its product offerings.

Source: Company Website, Primary and Secondary, CMI

KEY DEVELOPMENTS

2017 In November, the company launched StormRunner functional. It is a cloud-based, on-demand test execution service which scales web and mobile application testing across a range of test environments to speed-up the application delivery and decrease the application development costs.

2016 In November, Hewlett Packard Enterprise (acquired by Micro Focus) delivered application performance testing with HPE StormRunner load on Amazon Web Services marketplace. StormRunner helps in acceleration of web and mobile application development.

2016 In July, the company announced a merger with Hewlett Packard Enterprise's software business segment. The decision was taken to enhance its product portfolio.

2016 In June, the company launched upgraded version of tool Silk called Silk 17. It consists of legacy platform capabilities,for automated software testing of cloud and web applications as well as mobile platforms.

2016 In December, HPE upgraded IDOL machine learning engine with natural language processing. It can get data from anywhere virtually.

KEY DEVELOPMENTS

2018

In August, ScienceLogic, one of the key market players in context-infused AIOps, announced a partnership with HCL Technologies Limited to help HCL's enterprise customers with automated IT Operations.

2017

In August, HCL Technologies Limited launched AI-powered process transformation platform and consulting offerings. The company launched Cognitive Orchestrated Process Autonomics (COPA)' Platform for enterprise–wide process revamp and 'Transformation through Autonomics & Orchestration (TAO)' to bring top end top end consulting services to enterprises, looking to rebuilt their business and IT system on the foundation of AI.

2016

In October, the company won the Best AI Innovator Award at Alconics Awards (2016). The company won the award for Satori, a DRYiCE module that is an AI-enabled web application combining the functions necessary for conventional and new enterprises such as content and document management, personal profiling, enterprise social networking, enterprise search, business intelligence, workflow management, and an enterprise application store.

RESEARCH METHODOLOGY

RESEARCH PROCESS

Our research is an optimum culmination of secondary and primary research, with the latter playing a major role. We also have an in-house repository and access to a number of external regional and global paid databases to help address specific requirements of our clients. The research process begins with a holistic secondary research, followed by expert interviews. The information gathered is then comprehensively analyzed by our highly experienced in-house research panel.

PROPOSAL & MARKET TAXONOMY	MARKET ANALYSIS	MARKET EVALUATION & FORECASTING	DATA VERIFICATION AND VALIDATION	SERVICE/REPORT LAUNCH
▪ Market Scope ▪ Technical Analysis ▪ Market Taxonomy ▪ Prospect Database	▪ Future Growth Prospects ▪ Market Trend Analysis ▪ Competitive Landscape ▪ Absolute dollar opportunity ▪ Ecosystem Analysis ▪ Regional Trends and Analysis	▪ Historic Data ▪ Current Market Size ▪ Future Market Potential	▪ Primary Research ▪ Data Standardization ▪ Expert Panel Interviews ▪ Response Analysis ▪ Holistic analysis using Data Triangulation Methodology	▪ Press Release ▪ Whitepaper ▪ Social Media ▪ Campaigns Consultation
• Pilot Prospect		• Reconsideration • Value Addition
